R. Nandakumar - President

Manish Gandhi: Increasing demand for hightech, state-of-art audiovisual, lighting and integrated Experience Solutions across variouss industry sectors, offers exicting opportunities for manufacturers and distributors at the expo

Manish Gandhi
Director & Chief Operating Officer
ABEC | ITE

On behalf of ABEC Exhibitions & Conferences Pvt. Ltd., it is a pleasure to welcome all delegates and exhibitors to the 19th edition of the vibrant wtaking place concurrently alongside the inaugural edition of AV Integrated Systems expo 2019. We are thrilled to be hosting the first AV Integrated Systems expo.

We are determined to establish AV Integrated Systems Expo (AV-ISE) here in Mumbai, which the Indian AV industry had expressed an urgent need for a cost-effective, market-driven AV platform, which will deliver business. Our performance is proven, with the tremendous contribution of the PALM expo to the pro audio industry. Our commitment and investment to connect AV manufacturers and distributors with Systems Integrators (SI) and AV consultants will establish AV-ISE in 2019, in its first edition.

At AV-ISE and PALM, we are bringing the entire gamut of pro audiovisual, entertainment event and music production technology from across the globe. By doing so, we have created an excellent platform for achieving the ultimate goal, which is to further propel the immense potential of the pro audiovisual and professional lighting

industry in India.

Increasing demand for high-tech, state-of-the-art audiovisual, lighting and integrated Experience Solutions across various industry sectors, offers exciting opportunities for manufacturers and distributors. Latest technologies in entertainment events, music production, audio video integration and communications, networking on IP, laser projection, interactive displays and intelligent audio are being showcased today, by leading brands in eight halls/zones spread out across BEC.

With PALM expo and AV Integrated Systems expo taking place concurrently in the same venue, we have created an excellent showcase, which allows various industry stakeholders to source all their integration and installation technology requirements under one roof.

In an effort to sustain and augment adoption of advanced pro audiovisual and entertainment events technology in India, both PALM expo and AV Integrated Systems expo, have designed excellent and meaningful learning opportunities through educational platforms comprising of seminars, certified trainings, workshops and discussions led by industry experts and business leaders with a vision.

I would like to thank all our exhibitors and our valued partners, at PALM expo and AV Integrated Systems expo, who have helped us launch this important platform. They have been instrumental in supporting ABEC Exhibitions & Conferences Pvt. Ltd. organize this expo and its accompanying features which include PALM Summit, PALM Soundscape Conference, DJ Championship, Indoor Line Array, IRAA awards, AV Integrated Systems Summit, CAVS Certification Programme, AV-ISE Education & Training Programme, AV-ISE Project Gallery Walk of Fame and many other. Thanks to all our exhibitors, the expo is today being envisioned as an important platform for the AV industry in India. As an exhibitor at AV Integrated Systems expo, you have played a role in defining the future of AV in India.

A heartfelt thank you to all our esteemed guests and each and every delegate at the venue, for taking time out of their busy schedule to attend this event, thereby contributing to its success. A complete schedule and agenda of things happening across the eight halls of the venue is available in the PALM and AV Show pocket guide available in the PALM expo and AV Integrated Systems expo registration counters.

Last but not least, a huge welcome to Master Projection Designer, Bart Kresa, who has crafted unparalleled projection experiences around the globe. Today he is here with his awe inspiring SVIATOVID 270° which he brings to India for the first time ever, to be showcased at the inaugural edition of the AV Integrated Systems expo. I thank Bart for choosing the AV Integrated Systems platform to showcase this breathtaking creation.

PALM 2018 was a grand success and set a high benchmark, in regards to visitor numbers and this edition, which is being organized concurrently with AV Integrated Systems expo, promises to be even better. I wish you all a great show and more business at the 19th edition of PALM and the inaugural edition of AV-ISE 2019.

Manish Gandhi

Director & Chief Operating Officer

Anil Chopra: AV-ISE concurrent expo with PALM big opportunity to PA and Install sound to exploit System Integration

Anil Chopra,
Director, PALM Expo

PALM 2019 boasts of a concurrent expo this year. AV-ISE – Audio Video Integrated Systems Expo has been established this year, concurrent with PALM, creating the largest technology exposition in India, covering pro audio, stage sound and lighting, DJ equipment, studio post-production, av install, PA equipment, and AV Integrated Systems technology. 350+ exhibitors, 27000+ visitors expected from across all regions in India converge. The show into its 19th edition-consecutive and successive-is building the pro audio and AV industry in India. Providing international manufacturers a neutral and independent, reliable entry into the Indian market very cost-effectively. Period.

I believe in delivering business at the show and have always remained focused in doing so, focused marketing, thus attracting over 25000+ trade visitors in 2018. This show attracts the entire supply chain, focusing on providing solutions to each business visitor. Welcome to the largest showcase of information communication [AV-ISE] and entertainment [PALM] technology. Period.

Please ensure you have all information on the three parallel conferences running in hall 1, 3 and hall 4. You don't want to miss an important session! Speakers are leaders in their profession and topics are meaningfully chosen to guide your business to the next level. Networking at these conferences, I dare say is priceless. Meet the movers and shakers of sound, light, audiovisual industry. Spread across approx. 30,000 sqm and 12 halls. Grab a copy of the show guide to make use of your three days at the show!! Find the product you might be searching for and info on all highlight features of the show!! We have a handy version too.

The IRAA awards on 01 June in Hallare at a breakthrough point. I thank Promod Chandurkar at Sound Ideaz and Award Director, Mujeeb, and entire Jury. I haven't seen such sincerity and love for the profession. Period.

I'm so humbled at the gratuitous hard work and element of determination to find the right winner. I have planned to send out a loud shout "Recording Engineers are artistes". They're deserving of royalty from PPL It might be a tough fight, but then when the going gets tough, the tough get going. Tough Jury we have, and as Promod said all that is needed is leadership. IRAA stands for 'Recording Arts'. Period.

PALM Sound and Light Awards too is amazing, in that global brands deem this award an honour. Indian industry rocks and whom we chose to get up on stage, this year at the Hyatt Regency on 31st May, award nite. www.palmexpo.in has history of those who have made their mark. Period.

DJ Champions we will choose in Hall 4 on 31 June too will rock. International doors and clubs open for our DJ Champion. PALM DJ Championship now has global following. I thank Reji, our Championship Director for believing. Period.

What makes this show great is the die-hard exhibitors who have kept the faith. These 19 years pro audio, pro sound and light, install audio, PA audio, DJ sound, entertainment electronics, trade has remained fascinated with global brands, marquee names that conjure up true tech and experience. Future speaks now to Indian industry to make in India as over 19 years of developing distributors and distribution time is now for manufacturing. Develop brands too! True tech is for the making.

I believe PALM AV-ISE is the platform to launch new product, showcase innovation to a learned audience, and thus make brands, as the huge participation of buyers, actual users, professionals, developers, manufacturers, attend year after year to define the market. Period.

Source your solution. Have a great show,

Cheers!

Anil Chopra
Director, PALM Expo

Welcome to AV-ISE - showcasing latest AV technology to India 's AV market

AV Integrated Systems Expo is here, in response to the loud call from the increasing body of professionals and trade, to establish an affordable and neutral expo in India. I dare say "We've done it". The inaugural stand-alone expo is a very nice beginning to a great adventure, in creating an enthusiastic and highly motivated annual AV show hosting a robust and rapidly expanding audio video integrated systems market.

I thank very much all AV consultants and systems integrators who welcomed us and encouraged us to fulfil our promise. Indeed their spirit to participate in AV-ISE gave the mojo to persevere. The AV-ISE Summit conference in its very first year boasts of luminaries in conference topics relating to market needs. Once again thanks to the speakers. Their spirit of participation speaks volumes in favour of the expo. To state it clearly – These luminary speakers represent actual users who evaluate new product and technology and evidently they want the show. The three day conference in Hall 3 is a must attend to get into the spirit of the show, which is to develop AV industry in India standard, best practice, and adoption of latest technology.

AV-ISE Training Program is another initiative that is successfully launched. Am sure this is a winner for exhibitors who will exploit it fully in 2020 - Aurora takes the lead this year offering intensive training to professionals attending the show.

AV-ISE is determined to be a part of the phenomenon ongoing in networking sectors across verticals such as hospitality, education, corporate, government, cultural, sports. We will contribute and contribute meaningfully; my ethos is similar to any association that might pledge its intent to assist industry. Proof is the concurrent 19th PALM show in Hall 1 and 2 and 4 and 5 and Grande halls and the Qubes and Live Arena, and two conferences, a DJ Championship and IRAA Awards and PALM Sound & Light Awards. Witness 25,000+ visitors who benefited these last 18 years from the show. We intend to replicate this phenomenon for AV Integrated Industry as well. Period.

The AV-ISE Summit Conference has two highlights; one is global flag bearer of Projection Design and technology Bart Kressa delivering the keynote address. The other is our Recognition of Excellence to C S Chandrashekar for the Boeing Corporate office in New Delhi.

Another need is fulfilled in launching **AV-Integrated Systems** magazine. The response was euphoric. Almost the entire AV Industry I met was intensely excited and happy to see the mag. Great expectations will not be belied. We will report on all good work and inform AV consultants and SI and Actual Users on state-of-the-art tech to adopt and spread knowledge. Yes, Sir! Proof is the PALM Technology magazine running since 1986, 33 years of educating and informing the pro audio and stage sound and light market. So our ethos is to contribute and do all that association does to benefit the industry. There shall [should] not be any hesitation from manufacturers to support AV-ISE platform.

Building the show has been a challenge. I am dismayed at international magazines withdrawing support in being misinformed about our purpose. As I said in my message to the industry at the launch of the show, to quote "AV-ISE is not divisive it is inclusive". Industry Media will turn around I am sure, as will major international manufacturers who are eager to witness the first show.

I am proud to announce the successful beginning of our CAVS education program. Kudos to Ranjit Singh, PTS, Singapore Principal Instructor of the first CAVS course – "AV in the Digital Era' In Hall 3, over three days with a test and certificate for those who pass. CAVS is going to contribute tremendously in fulfilling a need to certify professionals who have taken a course.

I thank all participants exhibiting in AV-ISE and all PALM Exhibitors many of whom belong as much to AV sector. Their persistent in displaying AV Install™ solutions over 18 years has resulted in AV-ISE in 2019. In fact this year we have moved some PALM exhibitors into AV-ISE.

One of the most fantastic things to happen is the installation premiere of Bart Kressa Studio, Universal Spectacle-Stavatoid 270°- A New Experience. The 360° Stavatoid was premiered in Amsterdam at the February ISE organized by Avixa and Cedia. This spectacle mesmerized the world. Bart Kressa will be at AV-ISE three days and deliver the keynote address. He will also participate at the AV-ISE Conference. A must attend session. Bart Kressa is a Global Master Projection Designer. This opportunity is truly fantastic and I thank Bart Kressa for his exemplary motivation to participate in AV-ISE and share his **flowing video projection art** with attendees at AV-ISE.

AV-ISE will grow substantially in 2020 on promise of more participation. AV-ISE magazine will continue engaging the market. CAVS will soon have another course. There is no looking back.

Cheers!

Anil Chopra
Director, AV-ISE

Ramesh Chetwani,
Exhibition Director, PALM Expo

Ramesh Chetwani: The exhibition is a reflection of the pro audio and AV industry and the growth of these sectors reflects in the participation in the expo

With great pleasure, I welcome all of you to the 19th edition of the PALM Expo India.

I also take immense pleasure to welcome all of you to the first edition of the AV Integrated Systems Expo (AV-ISE) 2019 which is held in Hall 3 alongside PALM.

PALM & AV-ISE together will be the most powerful exhibition for technology in India.

The exhibition is a reflection of the pro audio and AV industry and the growth of these sectors reflects in the participation in the expo itself. Establishing itself this year, AV-ISE sets its foundation over a very strong and confident market. The market has

kept faith in our platforms. We are thankful to all the participants in PALM and AV-ISE.

Over a period of years, PALM Expo has grown tremendously and has successfully delivered business to all participants on the exhibit floor. This year, along with AV-ISE, the exhibition has grown over 25%, adding more new exhibitors than it did in 2018. Make in India wave is evident this year; Indian brands in pro audio are emerging. The exhibition has improved greatly, PALM is larger this year.

Our intensive engagement of AV industry has resulted in core AV technology companies and brands exploring business with actual users and trade visiting the show.

PALM AV-ISE is an independent, neutral platform that has welcomed and encouraged and given strength to all companies whether multinational brand manufacturers or Indian distributors. This is the reason why the show is so dynamic and everyone feels happy to participate and be present at the expo this time of the year.

We welcome you once again to attend all the features.

The Indoor Compact Line Array Demo continues with Milind Rao Rane, a reputed acoustic engineer consulting the feature is in its second year. There are five major brands participating. Line Array demo is very professional; the sound level is monitored with a SPL microphone ensuring a like-for-like demo to all participants.

There are three Conferences running parallel at the expo - PALM Sound and light Summit, AV-ISE Summit, and PALM Soundscape on stage sound and light. Industry leading speakers are participating. Conference program cover latest product technology and techniques

The HARMAN Live Arena that enthral the dealer/distributor community with the bouquet of Harman brands, will be hosted in its original location i.e. Hall 2 Annex.

This year the Demo Qubes enhances its avatar by improved acoustics and sound proofing. We have used the latest wood wool technology across all five Demos Qubes. Enjoy the new experience.

The 9th DJ Championships in Hall 4 will continue to enthrall the DJ Community. Fantastic prizes are to be won as well as assured celebrity status and worldwide acclaim.

Further sharing the Soundscape Hall 4 is the 13th edition of IRAA Awards ceremony recognising recording, mixing engineers.

With other features like the PALM Rigging and Trussing Workshop in Hall 2, the 3D Immersive Projection and Mapping, AV Projection Demo, Aurora IPBaseT Technology Certification course are in Hall 3. The CAVS course conducted by globally renowned Principal Instructor Ranjit Singh is in Hall 3. India's first CAVS experienced a tremendous response.

The biggest highlight at AV-ISE is Bart Kresa's Universal Spectacle projection mapping experience. Bart Kresa is the world's most leading Master Projection Designer. In 2014 PALM awarded Bart Kresa for Projection Mapping.

Have a fruitful business week and enjoy yourself at PALM AV-ISE.

Ramesh Chetwani
Exhibition Director PALM Expo

When everyone is counting on you, compromise is not an option.

DIGITAL 6000

The Digital 6000 with superior RF technology keeps the limited frequency spaces free for more channels and allows operation in an equidistant frequency grid where neither transmission performance nor audio quality are compromised. The series is more straightforward to use and is compatible with dozens of capsule heads and antenna options. It goes without saying that the superior Digital 6000 platform is setting standards today – and staying ready for the challenges of tomorrow.

SENNHEISER

Audioplus Launches Products by Studiomaster Professionals

Audioplus would be exhibiting **Fury Series Transducers** and **Vāk 30 Wireless Conference System** by Studiomaster Professionals on their **Booth no. B29 in Hall. 1.**

Fury Series Transducer is a vast range of high-quality transducers designed to deliver great sensitivity and excursion capabilities. The transducers incorporate powerful Ferrite magnets along with high-endurance Copper CCAW voice coils for the subwoofer and mid-bass transducers. Housed in a heavy-duty die-cast aluminum basket, and audio-grade paper cone and robust surround roll to achieve high acoustic output with

excellent sonic fidelity. Transducer also have striking Grey colored cones to make it visually perfect.

This series features F18120 - 18" 1200W (RMS) subwoofer and the following mid-bass models: F15.70 - 15" 700W (RMS), F15.50X - 15" 500W (RMS), F15.40X - 15" 400W (RMS), F15.40 - 15" 400W (RMS), and the F12.30X - 12" 300W (RMS). Among them F15.50X, F15.40X, and F12.30X features a unique dual cone design to delivers sharp and detailed mid frequency reproduction.

Also, fury series transducers

suits a wide variety of enclosure designs to deliver stellar performance for years

without losing their sonic qualities. Striking a right balance between high-quality and affordability, the Fury series is geared to unleash a fierce sonic performance.

Studiomaster Professional's Vāk 30 is a high-quality wireless conference system consisting of the **Vāk 30.s** - Main Controller Unit, the **Vāk 30.c** - Chairman unit, and the **Vāk 30.d** - Delegate unit. The system supports up to 50 units i.e. 3 chairman + 47 delegate or 1 chairman + 49 delegate units which can be operated with one controller. Support for up to 3 active Number of Open Microphones (NOM) and 20 UHF channels facilitate smooth meetings without any dropouts and interference. Its built-in USB MP3 recorder saves meetings on to external flash-based storage devices, ridding users from the hassle of taking down the minutes of the meeting. The master audio output is provided via balanced XLR and 1/4" connectors.

The Chairman and Delegate units feature detachable and flexible 21" 2-bend gooseneck microphone with premium-grade microphone capsules for clear voice reproduction. The Vāk 30.c Chairman unit features an intuitive priority switch that overrides all delegates during a discussion.

Both the microphone units can be powered up via the supplied adaptor or AA batteries for easy installation even in outdoor and mobile applications. The versatile and economical conferencing solution is ideal for small and mid-sized meeting scenarios in boardrooms, conference rooms, and other mobile meeting applications.

Datalogic India Pvt. Ltd. to Present Lighting Software from Vectorworks

Datalogic India Pvt. Ltd. representatives of **Vectorworks** brand, specialized in delivering a robust suite of capabilities to enhance the modeling process, to help users create one-of-a-kind experiences will highlight two new products - **Vectorworks Spotlight** and **Vision** on their **Booth B78 in Hall No- 2.**

Vectorworks Spotlight: It is an all-in-one and the only solution for those who work in the lighting design industry, scenic, film, event, or exhibit design. It offers users the flexibility to support the entire process of Design, Documentation & Production all in the single user interface. With this user will enjoy the

support of the new My Virtual Rig (MVR) import and export file format, as well as enhancements to 3D modeling with Spotlight tools and commands.

Vectorworks Vision: This software can easily explore changes to users design and wow their clients. This cross-platform,

intuitive software works with their console and equips the design creatively and efficiently, giving them the power to previsualize and cue shows at their fingertips.

Hi-Tech Audio Systems Pvt. Ltd. to Launch New Sound & Lighting Products

Hi-Tech Audio Systems Pvt. Ltd. a Pro Audio company and an exclusive distributors of many well-known brands will launch **L-Acoustics** new **X4i** speakers for small spaces and **Electronic Theatre Controls (ETC)** **Source 4WRD** at their **Booth No. H29 in Hall No. 1.**

The high-performance coaxial X4i is versatile, complementing a main L-Acoustics system as front or under balcony fill or as surrounds and overheads for multichannel L-ISA projects. It is capable of providing the output that users expect from L-Acoustics in a highly weatherized enclosure, purpose-built to melt into standard construction. Measuring only 3.9 inches / 99 millimeters deep, X4i can be hidden in walls, stair risers, stage lips and pit rails, yet still

produce the signature of an L-Acoustics-engineered, solid wood cabinet. On its own, X4i is ideal for vocal reinforcement and with Syva Sub, it can also be used for background music both indoors and outdoors in bars, restaurants, museums, conference rooms or any hospitality venue.

The company would also be launching Source **4WRD LED** which is available as a full fixture. Users can advance any full-sized, tungsten Source Four ellipsoidal to LED efficiency with Source 4WRD retrofit.

Key Features of Source 4WRD are:

- Advance any full-size, tungsten Source Four ellipsoidal to LED efficiency in seconds, and without special tools.
- Same optics, same accessories, same flexibility as a Source Four fixture.
- As bright as a 575-watt, extended life HPL lamp.
- 70% less power, no re-lamping, no-hassle swap out.

TwinPlex & Ultra-X40 Debuting at Palm

This year at PALM Expo in **hall 1, booth no. J09 & K03, Sun Infonet Pvt. Ltd.** will be debuting **Shure's** new **Twinplex** and **Ultra-X40** from **Meyer Sound**.

Designed to stand up to the toughest conditions, Twinplex provides natural audio at both high and low frequency when professional vocal performance is a must. The new patent pending capsule technology offers best-in-class sound in an easy-to-conceal package, ideal for quick costume changes or discreetly placed under wardrobe with no impact on sound quality. Developed with inputs from the leading audio

professionals, TwinPlex supports the diverse needs of theatre, broadcast, film and television, and corporate presentations to produce high-quality audio production with superior dependability.

It consists of four lavaliers (**TL45,**

TL46, TL47, TL48) and an ultra-light, fully adjustable headset microphone (**TH53**) in multiple colors with extensive accessories and options. Delivering the life-like vocal clarity and warmth. Its dual-diaphragm omnidirectional design yields extraordinary off-axis consistency and industry-leading low self-noise.

Ideal for unpredictable, high-stakes environments like theatre or reality TV, TwinPlex was pushed to the boundary during development and field testing to ensure flawless audio regardless of the condition it encounters. The super-hydrophobic coating and interchangeable sweat-resistant frequency caps keep the perspiration and moisture from upstaging the audio, while the medical-grade cable technology flexes to fit the costume design and demanding schedules that often come with associated uses.

John Born, senior global product manager at Shure states, "While developing TwinPlex, we gathered valuable input from leading industry professionals at every stage of the process and extensively tested prototypes to ensure we were

ready. This resulted in a comprehensive portfolio of more than 60 versions in a variety of colors, connectors, cables, frequencies, responses, and sensitivities to meet the demands of any application when you need amazing sound quality and unprecedented durability."

Adding to the list of new launches, comes a remarkable product from **Meyer Sound** – **Ultra-X40**.

Built on 4 decades of legendary performance, the new Ultra-X40 compact loudspeaker incorporates Meyer Sound's latest advancements in driver, distortion and phase response perfection into the form factor of the UPA. With 11 integrated rigging points, an abundance of mounting accessories and a horn that can be rotated without removal, the ULTRA-X40 is highly configurable for a wide variety of applications. The visitors can experience the live demo at **Hall no. __, Booth no.**

BY HARMAN PROFESSIONAL SOLUTIONS

For over 60 years HARMAN Professional Solutions has been developing world-class, award-winning technology solutions that set the standard for innovation and dependability. Music tours and live events require the perfect technology solution to immerse attendees in all the sights and sounds of the event. With HARMAN Audio, Video, Lighting and Control solutions, our touring and events' clients can deliver high-impact experiences to event-goers using dynamic audio and impressive visuals. With crystal-clear audio and exciting effects brought by an unrivaled family of legendary brands, HARMAN Professional Solutions is your single point of contact to meet all your tour Audio, Video, Lighting and Control needs.

Large Sound in Small Size Display by QSC India Private Limited at PALM Expo

A globally recognized leader in designing and manufacturing professional audio, video and control system solutions **QSC, LLC** will be displaying **CP Series** of Compact Powered Loudspeakers and **KS112, 12-inch, 2000-Watt, Active Subwoofer** along with an array of products at their **Booth- H37 in hall 1**.

The CP Series follows in the QSC powered loudspeaker tradition of high performance, superior quality and lasting reliability, in a highly compact and portable form factor. Due to its small size, CP is remarkably lightweight, making it easy to load, carry, lift and deploy in a wide range of portable and installed

applications.

Beneath its elegantly designed exterior, Both **CP8 and CP12** models are equipped with a highly efficient, 1000-Watt Class D amplifier, matching transducers and advanced DSP, delivering performance beyond expectations for a compact loudspeaker. With the ability to mix up to three input sources (mic/line, line and music playback device) at once, CP makes a great single-box PA system that sets up in seconds. As part of a larger system, CP can be deployed on a loudspeaker pole, as a floor monitor or as a musical instrument amplifier. One-touch DSP control with preset contours for the most common applications is also provided.

The KS112 is an ultra-compact powered subwoofer. It is the perfect choice for anyone needing high output low-frequency extension in a highly compact and portable package. Powered by a 2000-Watt Class D amplifier, the KS112 features a single 12-inch transducer in a 6th order band pass

premium birch cabinet featuring four rugged, low-noise casters. Onboard DSP provides variable crossover and savable/recallable Scenes for commonly used applications while Intrinsic Correction tuning and loudspeaker management maximizes performance and protects the subwoofer's components. Two M20 threaded pole receptacles are available for a positive, wobble-free connection to a threaded loudspeaker pole for either vertical or horizontal deployment (pole not included). An optional KS-LOC security cover prevents unauthorized tampering of controls.

Hitec DJ Academy to Introduce New DJ Courses

Hitec DJ is an academy which makes DJ lessons affordable and accessible to everybody. This year at PALM Expo they are going to introduce their two completely new courses in **Hall 1, Booth L70**.

Express Djing: This program is designed for students who are beginner and committed to becoming a working DJ Professional in a condensed timeframe. This program includes 16 hours of curriculum and hands on hours. The classes are conducted two times each week and there are no breaks built in to make students a crowd-ready, working DJ at the end of the program.

Scratching / Turntable: In this course, students focus on the rhythmic and melodic characteristics of scratching records on turntables. They expand their knowledge of scratch DJ culture, scratch patterns, and techniques through analyzing and performing transcribed scratch routines. Students also develop their own routines, enhancing their live performances with unique, turntable-generated sounds.

Learn **EXPRESS** Djing.

AV PROJECT GALLERY WALK OF FAME

AV Integration Communication Networking Expo has created an independent, neutral and all-inclusive open platform in India, fulfilling an important need for the AV-ICNx and Information Communication industry in India.

In line with the expo's mantra of "Motivating the market and putting technology in place", AV-ICNx has conceptualized a special Project Gallery feature at the expo, which is branded as the AV Project Gallery Walk of Fame. This gallery will enable top AV Consultants and SIs in the country to have a space of their own to showcase

their projects and expertise to a target audience of end users comprising – CTOs, CIOs, procurement and purchase managers across segments which include Corporate, Government, Hospitality, Retail, BFSI etc.

Within the AV Project Gallery Walk of Fame area, design consultant and integrators can display and highlight graphic and/or video presentations of their best and bespoke projects with succinct explanation of all the technologies integrated in the design on interactive / touch screen displays.

AT THE AV PROJECT GALLERY WALK OF FAME

AV PROJECTION DEMO

AV-ICNx projection demo with Epson's laser light engine, 16,000 lumens projector will be installed in the exhibit hall. Visitors will have a opportunity to experience projection technology at its best today. This projection feature is an experiential attraction. Actual users who are project planners will benefit greatly in this experiential feature. Laser light engine projection is state of the art. AV-ICNx brings you up to speed in adopting latest technologies. The 66 mt projection room will feature a screen of 4 mts (w) x 2.2 mts (h) provided by Lumina.

AV PROJECTION DEMO PARTNERS

Innovative Sound & Light Technologies by HARMAN Introduced at PALM Expo 2019

Harman is displaying **JBL A8 line array** at the Live Arena, **JBL 104 studio monitors**, **Soundcraft notebook series mixers** and Martin Lighting and ellipsoidal LED fixtures across the three days of PALM Expo 2019 at their **Booth: D09 in Hall no. 1.**

- **JBL VTX A8:** The VTX A8 is a next-generation Dual 8" Compact Line Array Loudspeaker with 110° Dispersion.

It delivers JBL Professional's flagship VTX A Series technology in a compact solution for small to mid-size rental and installed applications. The VTX A8 was designed to solve the diverse sound reinforcement needs of production companies, rental houses, theaters, houses of worship, as well as production applications requiring front fills, side arrays or other auxiliary support for larger-scale VTX systems. Proprietary JBL

woofers and their latest-generation high-frequency transducer and waveguide technology, provides unmatched performance, efficiency, and a consistent 110-degrees of horizontal coverage.

- **JBL 104 Reference Monitors** – This compact powered desk monitor gives content creators the ability to hear all the details for better results while mixing and editing. Drawing on seven decades of JBL Professional engineering, the 104 represents an innovative new set of speakers, designed from the ground up to provide the most accurate sonic presentation of any monitors in their class. With

the amazing sound that's made JBL the top choice for recording studios, cinemas and live concert stages in a compact, affordable and stylish desktop speaker, JBL 104 Powered Reference Monitors are ideal for recording musicians, podcasters, and music and video producers.

- **Soundcraft Notepad series** – This series comprises of three new Soundcraft Notepad mixers - **The Notepad-5, -8FX and -12FX** are desktop analog mixing surfaces that include HARMAN signal

processing, and USB I/O connectivity. Streamlined to meet today's audio workflow challenges, the new Soundcraft Notepad surfaces offer exceptional value and performance for podcasters, singer-

songwriters and audio professionals who require small format mixing solutions. Soundcraft Notepad mixers are designed for exceptional convenience and ease of use. A traditional channel strip layout provides fast and efficient access to desired channels and sends.

- **Martin MAC Allure Profile:** It features a novel RGBW light engine with unique 7-segmented beam control. With instant color control and pixelated beam, the MAC Allure Profile enables dynamic projection and mid-air effects, previously not possible.

The proprietary light engine sets new standards in compactness and efficiency, previously associated with larger, costlier fixtures.

- **Martin MAC Allure Wash PC:** It features a novel RGBW light engine with unique 7-segmented beam control. With instant color control and pixelated beam, the **MAC Allure Wash PC** enables dynamic diffused projection and mid-air effects, previously not possible. The proprietary light engine sets new standards in compactness and efficiency.

Martin VDO Atomic Dot – This hybrid lighting and video fixtures, available in WRM and CLD color temperature variants, combine a compact strobe, small blinder, video-pixel, and small spotlight. By combining a video-controlled Aura backlight and a bright strobe/blinder dot in one fixture, lighting designers are empowered with greater creative potential to make a bigger impact with audiences than ever before. The fixtures' compact design

also gives designers the ability to place VDO Atomic Dots just about anywhere and deploy them in larger quantities. Integrated support for P3, DMX, Art-Net, and sACN eliminate the need for additional interface boxes and onboard P3 eases pixel mapping and using the product as a video-controlled strobe.

- **Martin ERA 300 Profile** - It is a very compact profile fixture with an extremely efficient 260W white LED engine that produces a sharp gobo projection with a flat field and more output than typically associated with similar-sized and featured fixtures. This modern, everyday workhorse is designed to fit anywhere, is easy to handle and rig, takes up less truck space, and boasts professional features, including

CMY color mixing and 1:2 zoom and 9,500 lumens of output. Additional features include electronic dimming and strobe; color wheel; two layers of gobos,

including rotating gobos; iris; rotating prism and pan/tilt.

- **Martin ELP LED Ellipsoidal WW and CL** – This bold entry into the world of ellipsoidal LED fixtures are capable of delivering the luminance, brightness and vivid color rendering that has been synonymous with the Martin name for more than 30 years. ELP also offers innovative, industry-first features for precise, nuanced control and ease-of-use. Available in two versions: ELP WW (Warm White) offers industry-leading color rendering and brightness, while the ELP CL (Color) delivers rich, saturated colors and class-leading output. Both versions

can be configured with one of four Martin lens tubes in 19, 26, 36 and 50-degree beam angles. Plus, ELP can seamlessly integrate into your existing inventory via convenient third-party compatibility with industry standard lens tubes and accessories.

EVENT ORGANISED BY:

H V & Company to Launch PVR Audio's 18SW3600 Subwoofer at PALM Expo 2019

H V & Company, the authorized Indian distributors of PVR Audio Brazil, is all set to unveil new 18SW3600 subwoofer on their **Booth no. L81 in hall 1.**

This new subwoofer by PVR Audio features high power handling, 4.5" inner and outer wound voice coil, fiberglass fiber former, powerful optimized ferrite motor, ribbed paper cone and waterproof cone treatment - all specially designed to provide powerful and accurate sub-bass frequencies with low distortion and low power compression.

Due to its optimized ferrite motor assembly of 30 mm, the 18SW3600 is lighter than a comparable ferrite driver at this power handling, making it perfect for mobile DJs and portable PA systems where the highest power handling is wanted with minimum weight.

Also, a double silicon spider system ensures excellent control during large excursions of 54 mm peak-to-peak excursion before damage. A fully optimized T-pole design generates the minimum amount of flux modulation. The new dual forced cooling system guarantees a very efficient voice coil ventilation for minimum power compression and incredible power handling.

1. 21SW3000NDY-4 Subwoofer: This advanced, high-strength Neodymium subwoofer driver featuring 4.5" inside/outside copper coil with an unique dual forced design ventilation system. This combination delivers 1500 Watts RMS power handling and a minimum weight of 24 lbs. making this subwoofer an unique product in his category.

The combination of special treated

carbon fiber loaded cone assembly, large triple roll surround and a double silicon spider gives the 21SW3000-NDY-4 remarkable strength and excursion control under its large 13.2 mm Xmax.

Perfect for high output concert and nightclub applications due to its efficiency that's been designed to provide powerful and accurate sub-bass frequencies with low distortion and low power compression.

Active Voice Professionals at PALM Expo 2019

Active voice professional is a well-known speaker manufacturing company from last 15 years. This Year at PALM Expo 2019 the company would be introducing a wide range of neodymium and ferrite magnet drivers for pro audio

in affordable prices, specially designed for Indian users. The exhibitors can see these speakers at Pro AV booth in **Hall no.1 booth no. D88.**

These Made in India speakers comes in many different models. Among them the company highlights would be range the two products mentioned below:

- **12AN600:** - This neodymium driver is one of the best products for high-mid applications. Its design make driver more reliable during LONG play and hard play. It delivers 600W RMS, 1200W Program power and can be used for line arrays, Point source etc.
- **18AN1500:** - This neodymium driver is a Bass Monster and Earth Shaker with 1500W RMS, 3000W Program power. It can easily full fill your low frequency requirements for any time anywhere.

Decibel Pro Systems to Display Celestion CDX20-3020

Decibel Pro Systems, the authorized channel partners of top professional audio brands will be displaying Celestion CDX20-3020, which was originally launched in August 2018 at their **booth A21 in hall no. 1.**

Key Features of Celestion CDX20-3020

- It is a high frequency driver with power rating of 100Wrms and nominal impedance of 8 ohms.
- Magnet type that is used in this Hf Driver is Ferrite.
- CDX20-3020 has 3-inch Voice Coil Diameter with a throat exit of 2"

XMLITE®

More than you want.

ABOUT US

Guangzhou Xiangming Light Limited – XMLite, is the supplier of Moving Head lights located in Guangzhou, China. XMLite has nearly 8000 square mts of manufacturing capacity, 120 skilled staff and 15 engineers. XMLite has marked its presence in India since last 8 years now. XMLite products are sold in over 50 countries and the product quality is recognized by all the users. XMLite is also providing OEM services to other major Brands all across the globe. XMLite is the first company in the Indian market to offer 3 years guarantee on their products. 2019 being a breakthrough year for XMLite has proposed a revolutionary 18 months/ 500 hours warranty (whichever earlier) on its lamp for its new model – LLP400. Sound Emporium located at 5/32, Kirti Nagar Industrial Area, New Delhi, www.soundemporium.co.in is the only proud distributor of XMLite products in India.

• LLP400

Global Pro-Audio Management Integrating the Sound Industry Under One Roof

Among **Global Pro-Audio Management's** PALM Expo 2019 launches the key highlights are **Outline Superfly** and **Musicson FALCON – 210DA**.

Outline's Superfly is a compact line-array loaded with design DNA from one of the most influential loudspeaker designs of the last 15 years. It has established new boundaries and performance never before generated by a compact line-array system, redefining low-frequency performance with dual individually powered 10" drivers providing real punch down

to 50Hz. Matched with dual 8" midrange and a 3" HF driver providing unparalleled presence and clarity all the way out.

Musicson's new FALCON-210DA features a 96KHz / 64-bit DSP input module and powered by a new 3rd generation D-class power module. By using the Musicson software it is possible to compare, configure and control each speaker of FALCONS-210DA when connected to a star network. The sound technician can choose from several factory presets, and adjust general gains, up to 10 EQ filters, general input and output MUTE, Signal Input limiter, as well as an input delay of up to 800 ms. It is also possible to monitor the input and output signal levels in real time.

Along these, the visitors can also view and experience the performance of

several other products at Global Pro-Audio Management's **Booth F29 in Hall no. 1**.

MX-MDR Technologies Ltd. to Present a Wide Range of New Products

This year at PALM Expo 2019, **MX-MDR Technologies Ltd.** would be launching a wide range of new products at their **booth no. F09 in hall no. 1**.

The key products of the booth will be MX Line Array Series comprises LA28 –Dual 8" Line Array Wooden Speaker, LA210–Dual 10" Line Array Wooden Speaker and LA212–Dual 10" Line Array Wooden Speaker.

Another product will be MX Live Air Mixer Series feature AIR 8U – MX Professional 8 Channel Live Mixer with Bluetooth and USB Connectivity, AIR 10U – MX Professional 10 Channel

Live Mixer with Bluetooth and USB Connectivity, AIR 14U – MX Professional 14 Channel Live Mixer with Bluetooth and USB Connectivity and AIR 18U – MX Professional 18 Channel Live Mixer with Bluetooth and USB Connectivity.

Altron Electronics will be Launching BETAMARK Amplifiers

In **Hall. 1, Booth. C41**, Delhi based **Altron Electronics**, pioneer in providing latest Public Address system and DJ equipments for more than 35 years is all set for the grand launch of their latest series of Professional Amplifiers and Loudspeaker system in the name of BETAMARK. The lineup of new products include **BETAMARK AX SERIES (AX6050, AX4050 and AX3050)** professional amplifiers and TD Series (TD9500 and TD8500) amplifiers along with Loudspeakers, wired and wireless microphones, connectors and sound boxes.

The new **BETAMARK AX SERIES (AX6050, AX4050 AND AX3050)** amplifiers boasts top notch power up to 6600 watts with built in 4 Fan System

and Double Crossover system for each channel, making it the best in class for live performance and installations. With advances circuit protection and toroidal transformer, it delivers exceptional power with increased reliability, clarity and performance.

For power thirsty bass speaker system, the new **TD SERIES (TD9500 AND TD8500)** amplifiers offers dynamic power of 9200w and 7000w

in compact design with advanced TD class power modules and high sensitivity CMRR and channel independent protection warning indicators.

AV EDUCATION AND TRAINING

Education being the one mantra pervasive across AV sectors, AV-ICNx Training & Education programme will offer a range of training programmes to improve and develop the AV technician's technical competencies and professional expertise, while also disseminating information on quality standards and best practice.

IPB_{ASE}T®

CERTIFICATION: IPBASET TECHNOLOGY SPECIALIST

SPEAKER: MR. NATARAJU UPPUTURI
MR. AMITH C PILLAI

DATE: 30TH MAY, 2019

SESSION CONDUCTED BY: Aurora

Aurora's IPBaseT® combines a variety of 4K IP technologies and features under one unified protocol using a simplified topology. This day-long course starts with an interactive session covering the basics of IP networking, followed by hands-on training exploring an AV-over-IP system.

PREREQUISITES:

Before taking this course, we recommend that attendees have the following knowledge,

- Basic knowledge of IP network devices, networking protocols and network topologies
- Familiarity with audio and video signals, connectivity and digital media

CERTIFIED AV SPECIALIST

tAV-ICNx is leading the charge with initiatives like the three-day Certification Course in AV Install & Integration – CAVS. The CAVS Certification is aimed at providing knowledgeable manpower, replacing the 'electrician' with a 'qualified integrator' and creating a talent with specific learning for AV integration.

The Certification Course in AV Install & Integration is designed to provide knowledge of audio and video fundamentals and enhanced troubleshooting skills, while promoting best-practices and technological expertise of systems technologies

Ranjit Singh

Principal Consultant for Workspace Technology & Experience at PTS Consulting Singapore

The focus of the CAVS programme this year is: "AV in the Digital Era"

The course aims to empower attendees with an understanding of technology and trends in AV, that are driving meeting spaces in today's Digital Era. The CAVS training will cover basic foundations in a three part series on Audio, Visual & IT across the three days of the show.

The course will be conducted in the following parts:

AN INTRODUCTION TO AUDIO, VISUAL & CONTROL

- 1** PART
- a) The Basics of Audio, Visual and Control
 - b) Understanding Factors When Designing Meeting Spaces

UNDERSTANDING THE REQUIREMENT

- 2** PART
- a) Asking the Right Questions
 - b) Identifying the Right Requirements
 - c) Understanding the Flow of a Technology Project

TECHNOLOGY AND TRENDS

- 3** PART
- a) Understanding How Lifestyles Are Driving Design
 - b) Why Technology Underpins the Meeting Space Experience
 - c) What is Important to Meet the Demands of Today

SAVE THE DATES FOR NEXT YEAR : 28, 29, 30 MAY 2020

Sound Solutions Display for Large Venues by Narain Audio and Lighting LLP

With more than 10 years of experience in the pro sound and light industry, **Narain Audio Lighting and LLP** would be showcasing a series of products at their **booth - B09 in Hall. 1** in PALM Expo. On display the company will highlight **K-LA212-DSP** line array along with their highest selling **MT Series** of professional amplifiers.

K-LA212-DSP is a 2-way active DSP-controlled line array speaker which was originally launched in 2006. It incorporates a novel phase corrector, which shifts the center of the speakers closer to the center of the box. This same corrector optimizes the working frequency of the speaker and the waveguides system of the horn, getting a sum of +6dB on the entire response band thus creating a two-way coaxial system capable of achieving a consistent response across the horizontal plane coverage.

The visitors will also get a chance to see the highest selling MT Series of professional Amplifiers in its class

in India. They offer a stupendous 99% reliability along with a strong internal hardware to handle the riggers of transportation. Its MT1201 Transistor PCBs use highly stable ONSEM 28 nos NJW0302 & 28 nos NJW0281 output transistors to give outstanding power. Carling switch circuit breaker is used which ensures very good DC inrush protection.

The lowest power consumption is less than 0.1A when working without load. MT series aims at mid end market segment and professional fixed installation market with people who have tight budgets and need stable and high-quality amplifier. This series is great for large

performances, discotheques, nightclubs, stadiums, cinemas and rental and live performances.

Audio Note India Recreates the Sound with Smyth Realiser A16

Audio Note India the only representator of Audio Note UK will be launching the **Smyth Realiser A16** real 3D audio headphone processor at their **booth no. 1102 in Hall no. 1**.

The new Smyth Realiser A16 is an Immersive Audio Creation for Production & Reproduction via Headphones. This cost-effective headphone processor can be used for high-quality multi-channel mixing, sound-track proofing, off-site proofing & home-studios. It recreates the complete experience of listening to any real loudspeaker system in a real room - in up to sixteen channel surround sound in headphones.

The emulation includes the precise localization of all the speakers in the room, the room acoustics, and the response of the speakers and the electronics in the emulated system. In immediate A/B comparison between the actual room/speakers and the Realizer/headphones, listeners say the two are indistinguishable.

Some more features are mentioned below:

- Renders up to 16 virtual loudspeakers in any position via headphones;
- Supports any speaker format, e.g. Dolby Atmos, DTS:X, Auro-3D, Ambisonics and legacy in real time;

- SVS head-tracking
- 16 single-ended analog audio inputs
- 16 digital PCM audio inputs (24-bit 96kHz) via USB
- 8 digital PCM audio inputs (24-bit 192kHz) via HDMI

New LED Ranges Launched by Leksa Lighting Technologies

With the growth of the display-based LED technology, **Leksa Lighting Technologies** has announced the launch of its conex led video conference light and LED ENG Kit which can be seen by visitors at their **booth no. I57 in hall no. 1.**

Conex LED Video Conference Light: This product is an excellent

choice for video conference applications. Leksa Conex Video Conference light is a specialized lighting system for giving the decent reproduction

quality in terms of accurate skin tone and to avoid shadow based ugly images. The

reproduced images captured with highly sensitive cameras using Conex VC Light. This is also compatible for HD & 4K video transmission up to 10000 FPS. It is CCT Tunable with color temperature selection from 3000K to 5600K highly pure output whose CRI & TLCI above 97 and R9 Value above 95 completely color corrected flicker free soft light with pan and tilt option. These lights are with 0 to 100% smooth dimming with RF controller and Bluetooth.

LED ENG KIT: This kit comprised of specially designed lens for uniform spread of the light, smooth dimming with optional DC Power socket which is ideal for Indoor/ Outdoor shoot. It allows user to create a quick setup for Gathering, Small Shoots, Photography and Videography purpose.

It features seamless CCT variation from 2600K to 5700K through manual and DMX

option. It also features highly pure CRI & TLCI above 97 and R9 Value above 95, color corrected flicker free DMX IN/OUT Sockets with 7 segment digital display.

This Kit comes in 2 different combinations: 3 Light Kit with 2 Nos of 30W & 1 No. of 60W; 4 Light Kit with 3 Nos of 30W & 1 No. of 60W.

Outdoor and Fix installation Platinum Purples Cables

Cables specialist Platinum **Purples Cables Solutions** would be exhibiting their Extra soft cables for outdoor stage speakers and high-performance fix installation

speakers' in **hall- 1 booth. B93.**

As per the company the extra soft outdoor stage speaker cables are specially made with OFC COPPER. They cables are

High-Performance Fix Installation Speaker Cables

flexible, long lasting and easy to roll out.

On the other hand, the High-Performance Fix Installation Speaker Cables are Twisted Pair tinned copper cable, gives very high Transmission speed. These cables are also covered by Thermo plastic Polyurethane (TPU) Coating which is very good in flexibility and protect cable with moisture.

Musikshack International Pvt Ltd to Unveil New Product

Musikshack Internationals would be lighting its line of highlighting products the Gravity KSX 2 Keyboard Stand and Orange Rocker 32 in **Hall no. 1 booth no. C81.**

Gravity KSX 2 keyboard stands are designed for safe support and easy portability, made of heavy duty steel with reinforced joints, durable powder coating and grippy pads it provides an easy setup with height adjustment for both sitting and standing playing positions.

Orange Rocker 32 is an all valve stereo guitar amp in a compact and portable combo format. It's 2X10"

configuration delivers a full and fat sounds with keeping the footprint small. At the heart of the Rocker 32, though,

as its stereo effects loop which opens a world of limitless possibilities for your effects/pedal board.

SOUND PARTNER

Honeywell ProSound Keeping Audio in Line

Honeywell International India Pvt Ltd who has recently announced its entry into the professional audio industry with "**Honeywell ProSound**" is launching ZOELINE and ZETA-TOUR8 Line arrays.

The new ZOELINE is a premium Line array which ensures high directivity and uniform coverage of sound for any performance venue. The ZOELINE 8822 tops along with the 18" High power flyable subs are fantastic sounding pair and provides crystal clear audio quality for auditorium be it speech or chest thumping music.

Features of ZOELINE

- 2X8" Neodymium LF drivers
- 2X1" Neodymium Compression Driver with 1.75" Voice Coil
- High directivity
- 9 Preset EQ for various positions
- Built-in 32-bit DSP
- Built in Dante
- ZOELINE Array software for accurate tuning

ANother on display would be ZETA-TOUR8 line array ensures that users get

their unique sound wherever they go. With its light weight combo of 8, 3.5" wideband drivers and a 15" Subwoofer, provides a SPL of 130dB. Its dual input combo jacks and single RCA connectivity enables users to just plug-in their guitar, microphone, MP3 player to make them ready for the

show in no time.

Features of ZETA-TOUR8

- 3.5" X 8 Wideband drivers
- 15" Active Subwoofer
- 130dB SPL
- 2 Combo connectors & RCA

Visitors can also see and experience them along with numerous other products at company's **booth- J57 in hall no. 1.**

Max Effect Pro Sound System & light to Launch an Array of New Products

Max Effect Professional Sound System & Lights rental company is known for providing quality services to its customers from professional sound and lighting industry for over a decade. This year at

PALM Expo in **hall. 1, booth. C83**, the company would highlight **Max Effect ME1000Q from Max Effect Series** and **Max Effect PE 7500 from Max Effect PE Series**

along with a range of new products which include amplifiers, audio processors, speaker drivers and more.

Max Effect ME1000Q from Max Effect Series amplifiers features Stable performance in 4ohms at low temperature, Pure copper ring toroidal transformer, Customised design heat aluminum (heatsink), Customised fans and Original Toshiba transistors that provide the best sound

quality. All these features allow this model to work efficiently at high temperatures.

Max Effect PE 7500 is two channel amplifiers feature professional class H topology with seamless switching, ultra-high-power output with very low distortions, multiple perfect work protection measures. It produces 2600W RMS stably at 2Ω which makes it compatible with the large and medium-sized application.

Numen Electric Company to Exhibit Products for Lighting Industry

Numen Electric Company is one of the most recognized and trusted name in the field of Supplying Power distribution systems would be showcasing Power Distribution Panel which is also known as **Power trolley** and **Rubber Distribution box** with 63A Incomer with RCCB/MCB. The visitors can see them live in **hall no. 2 at booth. D77.**

Iris Buildtech Private Limited to display Various Sound Solutions at PALM

Iris Buildtech Private Limited would be demonstrating its latest **Harmonic Design HLS24 TourSys 2** and **DARE Audio RT12:18** compact line array on their booth – in hall no.

Harmonic Design HLS24 TourSys 2 allround PA-System System is setting new standards in all disaplines in double-12" class.

With the use of multiple 1.4 compression drivers the typically occurring distortion of a single driver at higher levels, is dramatically reduced. Another advantage is the improved headroom to cover larger distances. It features 2x hd HLS24P Hybrid Line Source, 4x hd Infra218 Hybrid Subwoofer, 1x hd X4 system amplifier, live music, DJ and speech up to 1.500 people, compact dimensions, light-weight and easy handling, extreme high SPL, remote surveillance & remote control, plug & play, system power: 12.800Wrms

DARE Audio RT12:18 are Fully Active Network Transmission Line Arrays, designed for mid to long distance requirements. The Speakers are extremely versatile and can be used for multiple purposes namely Small Outdoor Concerts as Line Arrays, Theatres and Auditoriums as they can be suspended, Small and Medium sized venues like clubs and pubs.

Aside to HLS24 TourSys 2 and DARE Audio RT12:18 compact line array, Irish Building Private limited would display a line up of other products line up also.

24 Carat Temple Gold Color for Speaker Cabinet Introduced

This year at Palm Expo in **Hall No.1 Booth D93**, Hari Industries supplier of the speaker cabinet coating for touring cabinets and cases namely Granotone will be introducing 24 Carat Temple Gold color

for Speaker Cabinets. The shimmering and luxurious effect of 24 Carat Temple gold will make cabinets stand out from other cabinets.

The company will also be displaying

granotone speaker cabinet paint which is widely accepted in Asian and African markets well. The option of the tailor-made coating as per client's requirement is also available in roller, sand and spray finish. This waterproof and low VOC paint creates scratch free and weather resistant finish.

Octune Electronis LLP to Display Sweton Subwoofers

Octune Electronics LLP would be displaying a range of products at their **booth G49 in hall no. 1**.

On the display will be Sweton's **18PT 1500 SUB** and **18 PT 2000 SUB**. According to the company both the subwoofers are very efficient in their respective category as compared with other similar products available in India.

Modern Stage Service Makes Spotlight Entry at PALM Expo 2019

Modern Stage Service, a pioneer in the field of lighting and designing stagecraft equipment is presenting DTS CORE moving head and ADB Lexpert Profile L LED light in **Hall no. 2 at the booth. D17 & C18.**

According to MSS DTS Core is a 24 kg's powerful and compact spot and beam moving head with the fastest effects ever seen. It features like 440 W HRI LAMP (24,000 Lumens), perfect in a range of applications, makes it versatile for all the applications ranging from TV studios to live concerts.

Other features of DTS Core are mentioned below:

- Lamp: Osram Sirius HRI 440 W (24,000 Lumens)
- 1,530,000 Lux at 5 m
- 16-bit motorized wide-excursion linear zoom
- 16-bit motorized linear focus
-

Linear dimmer / shutter / strobe (0.85 flash/sec to 10 flash/sec)

- Frost Filter
- Overlapping wheel for multiple effects:
 - _ Customizable rotating gobo wheel (9 gobos)
 - _ Fixed gobo wheel (17 gobos + animation sector + open)
- 8-facet rotating prism

Another highlighted product is LEXPERT Profile L by ADB-OSRAM. It is a white LED light produces a powerful, high quality light beam. It is available in two different

versions with different color temperatures i.e. warm (3200K) or daylight (5600K).

These modules are built to be modular: the body works together with an optical unit with either a 15°-30° or a 25°-50° zoom. The two zoom modules are perfectly interchangeable with each other.

Also, Lexpert Profile is equipped with a very versatile dimming system. Users can choose between 8- and 16-bit operation

on five channels modes, with four preset dimmer curves. Alternatively, intensity can be manually adjusted using an easily accessible knob on the back of the unit.

JINALI ENTERPRISE ACCENTUATES ITS LINEUP OF NEW PRODUCTS AT PALM EXPO 2019

In hall 1 at Booth 89, Jinali Enterprise, would be displaying **HDMI RS232 CAT-6 Extender 100M** which is based on standard IEEE802.1Q Ethernet. It can transfer the HDMI signal via CAT-6 cable from the HD Audio & Video products (Blue-ray DVD, PS3, PC, STB) to HDTV/Projector. It also supports the highest resolution 4Kx2K (3840x2160). The max transmitting distance is 100M and support HD BaseT, RS232 and Lan transmitting at the same.

Another product is 1x4 HDMI Splitter which uses a single HDMI source, accessing to multiple HDMI sinks. It allows one HDMI device to be split easily to 4 HDMI compatible monitors or projectors. In addition, it can be

placed at the end of a long HDMI cable to regenerate the HDMI signal. The resolution of this HDMI splitter can be up to 3840X2160/60Hz.

This product can also support EDID management function, comes with eight kinds of EDID mode, the users can choose according to their own

needs. In addition, this product comes with a built-in IR extension function.

Support AWG26 HDMI standard cable:

- when the resolution is 1080p and below, input up to 8 meters, output to 8 meters.
- when the resolution is 4K, input up to 8 meters, output up to 8 meters.
- Support single HDMI source , accessing to multiple HDMI sinks, the source can be DVD player, A/V receiver, set top box and etc.
- Built-in IR extension function. (it can work with our HDMI 2.0 repeater which has IR-RX to receive the IR command to remote control the source)
- Support serial port online upgrade
- Support EDID management
- 5V/2A power adapter

LBT Electronics Pvt Ltd to Launch their Lighting Innovation

Established in the year 2008, **LBT Electronics Pvt. Ltd.** is a renowned Exporter, Trader, and Supplier of a wide range of lights for varied application areas. This year at PALM Expo 2019 the company is all set to launch **Aurora 150 LED** and **Hulk 380 3-in-1** along with other products at their **booth. D57 & D65 in hall no. 2.**

New Aurora 150 HEX is an innovative 6-in-1 LED static Wash light with classic one big homogeneous lens Optic and excellent color mixing. It is an ideal dream tool for TV, theatre, opera, studio, exhibition, Motor Show, multi-functional hall and so on.

Other features of Aurora 150 HEX include

- HSIC system to make color mixing simple and easy
- Precise pre-set CCT 1800-8000K
- high CRI >90.

Another new product is Hulk 380 3-in-1 which is one of the most durable and stable 380w beams. Its exclusive design comprises mold opening, elegant atmosphere Magic zoom, 2.5°-52° electronic zoom Professional copper cooling module, etc. It also allows the user to adjust fan speed which in turns help to reduce the

product noise effectively for two times. **Other features of Aurora Hulk 380 3-in-1 include:**

- Ballast: Electronic ballast
- Lens: high precision optical lens system
- Channel: 19/24 Chs
- Display: Color LCD display screen
- Color wheel: 11 colors+ white

Lighting Innovation on display by Pink Noise Professionals Pvt. Ltd.

Pink Noise Professionals Pvt. Ltd. is at PALM Expo to Showcase multi-platform lighting control system **LightShark** with up to 8 DMX universes. It has an ultra-fast Web-based User Interface, which allows users to connect up to 3 devices simultaneously to create their own multi-screen control system. Due to this feature, it is not necessary to install any software or driver, being a plug & play solution that makes the system controlled from any device with a web browser, regardless of the operating system used (iOS, Android, Linux, Windows, macOS).

LightShark is an ideal tool for nightclubs, DJs, corporate and medium-sized events, schools, churches, etc. Its range comprises two independent hardware products with the integrated Lightshark software engine, **LS-Core**, and the **LS-1 console**, both developed and fully designed in the lighting division of WORK PRO.

LS-1 brings together the best features of the world of lighting control, with innovative and exclusive software that is

combined with ergonomic and intuitive controls. LS-Core omits the physical part of LS-1 but offers exactly the same lighting control software, processing power, and a smartphone/tablet based software control interface.

LightShark has a clear and simple user interface, so that any lighting designer, in just 15 minutes, can use 100% of the LightShark functionality. Beginning users will adapt quickly and can create spectacular environments due to its integrated FX engine.

Pink Noise Professionals Pvt. Ltd. would also be displaying more products at their **booth. G45 hall no. 1.**

Wide Range of Products Display by Aerons (India) Exim Private Limited

One of the leading traders' exporters and distributors of international brands like Faisal Pro, Fidek & SR Sunrise, Aerons (India) Exim Private Limited, would be displaying HDLA 8055-way line array along with several other products in **Hall no. 1 at booth no. F45.**

HDLA 8055 is a line array loudspeaker which was originally launched in Feb 2019. It comprises of 1× 12" neodymium LF drivers, 3× 3"

neodymium MF drivers and 2× 1" neodymium HF driver with line array horn, made of high-quality plywood with polyurea waterproof paint. This system is ideal for medium scale sound reinforcement.

Other features include; High quality plywood with polyurea waterproof paint; High quality neodymium components; Passive or Bi-amp operation and Convenient for hanging and stacking.

Premier Wholesaler Private Limited Getting Sound Solutions from Small to Large Venues

The official distributors of renowned brands like **RCF, Sennheiser, Digico and BT Star Acoustics- Premier Wholesaler Private Limited** is getting an array of products at PALM Expo 2019 in **Hall. 1 at Booth C45.**

Among them the company' highlight would be **BT Star Acoustics-Premier ATS-8008**, an 8" three-way line array loudspeaker with all advantages of line array speaker. This product is suitable for small to mid-applications and can be

hanged up, also can stand on the ground. It also has inbuilt crossover inside, which contain together MF with HF. It is best combined with AH 2215BW Sub-woofer.

Another product is **BT Star Acoustics-Premier AH-2215 BW** which is a 2*15" horn loaded Subwoofer system. Its cabinet is made of high-quality birch plywood with fillister at each side for combining to avoid air emission. Due to its design, this product is best suitable for an outdoor live show, and for the venues with low frequency.

Saba Trading Co.'s First Waterproof LED To Make its Debut at PALM Expo

Saba Trading company are specialized in manufacturing transformers and power supplies. Their product range includes Transformers, DC Power Supplies, SMPS Power Supplies and Digital Panel Meters.

This year in **Hall no. 2, Booth- B75** the company would be displaying The Studio One TH-326 Stage Video Panel Light LED. As per the company, this bi color led soft light is a new design technology improvement, with Lightweight, Thin, High Brightness and Silent.

This LED model is a perfect replacement of led panel light at affordable prices. Its led video soft light lifetime is about 50000 hours, which can easily replace the traditional soft light, reduces repairing cost and the need for replacements. A Die-casting Aluminum housing protects internal components and powder coated to resist rust. This LED area light is equipped with a

constant-current driver and operates within a wide 100-240VAC range. For LED soft light panel power supply, it has Mean well through which users can choose a silent fan for cooling which is very quiet and hardly to makes any noise

TH-326 Stage Video Panel Light LED lighting system was designed for the studio and other applications where high-definition lighting needed. It produces color temperature both cool and warm around 3000 - 6000K which is adjustable.

Another product is 200W waterproof folding **LED Frensel Model no. Th-351**. This led folding Fresnel spotlight is a soft-edged spotlight with more control over beam angle than floods, but less control than profiles. Its size of the beam can be adjusted by moving the lamp and reflector closer to or farther from the lens, by our designed of manual zoom function by the knob, by rotating the knob to change it. This model can focus a breeze even without a board operator, due to manual overrides for zoom and dimming on the back of the unit. It is a perfect fit in theaters, studios or other environments that require smooth, even washes of light.

For the Display this model has the touch screen facility which makes it a more convenient operation control product. There are 4 kinds of dimmer curve: Standard mode, Incandescent

mode, Quick mode and Linear mode. The frequency from 500 Hz ~ 25000 Hz, and flicker-free on the camera, very suitable for all different kinds of event: stage, studio room, broadcast, museum and so on.

Theatre Fresnel's spotlight led color temperature produces the cool and warm color (3200 or 5600K) that looks just like natural sunlight and mimics the performance of tungsten fixtures. Its beam angle can be DMX adjusted between 20° and 55°. led Fresnel spotlight for theatre temperatures and tints can be tweaked to perfectly illuminate individual skin tones, so they look great in person and on camera. Both arrays output an incredible amount of lumens, for the brightest light in their respective color-temperature ranges.

Folding led Fresnel light power supply is from 100~240V with PFC protect, can protect the power well, for the theater use, we choose a silent fan for cooling, it's very quiet and hardly to hear any voice.

Complete Conference Solutions by CKS Acoustics Introduced at PALM Expo 2019

CKS Acoustics will be launching their Conference System, wireless Conference System, Wired Microphone, wireless Microphones, Portable PA System, Ceiling Speaker, wall Speaker, Outdoor Speaker, Garden Speaker, Speaker Columns, Power Amplifiers and DSP Processor for Conferencing & professional audio system. The visitors can excess all the products in **Hall. 1, Booth J81.**

Among them the company highlights would **CKS DSP Processor 1616** and **wireless conference system.**

DSP Processor CKS 1616: The CKC-1616 is a powerful 16-in and 16-out digital audio processor and touch screen operation is used to control interface display. Its ADI SHARC 4th generation of ADSP-21489 floating-point audio DSP chip provides the supreme performance 400 MHz/2200 MFLOP processor capacity. The ultra-low ground noise pre-amplification circuit, low-distortion analog circuit and 114dB audio AD and DA Provide high-quality sound in field. The 5-inch 16-bit true color (64K colors) touch screen is used to adjust channel volumes and call

32 audio effect scenes; display the current device IP addresses and the presetting numbers and presetting names used the processor for the administrator's quick identification and identifying the

DSP Processor CKS 1616

current processors in the system. The front panel is composed of network connection status indicator and error alarm indicator. Where gross error occurs, red alarm

indicator twinkles. The device is connected with Android system and smart phone or tablet PC operation software package is supported.

WIRELESS CONFERENCE SYSTEM:

Digital wireless conference system processor CKC-990: The CKC-900 wireless digital conferencing system is a set of

digital wireless conferencing system operating at UHF high frequency band. The system is operated under full digital mode and various speaking modes and can be connected to CKC-

900VP video host to achieve video tracking function. The FM is used to transmit sound signal, Hi-Fi, high SNR and without sound delay. The unique new condenser microphone core with characteristics of

whistling-free, unidirectional performance and high-sensitivity makes sound of the conference almost perfect. The data communication algorithm independently developed for conferencing enables system response rate not subject to number of delegate units within signal coverage. Users add or remove delegate units flexibly. System

delegate unit capacity ≤ 1255 pcs (including 1 chairman unit).

Digital wireless conference system

Microphone CKC 991 & CKC 992: Overview With high flexibility and reliability, this UHF wireless conference system is an ideal choice for mobile conference systems. It offers simple operation, compact structures.

Marands Technologies Pvt. Ltd. to Amplify the Sound at PALM Expo

Marands Technologies Pvt Ltd. is a high-tech company specialized in researching, manufacturing, and marketing of public address speakers, amplifiers, microphones, audio mixers, and various connectors are coming at PALM Expo in **Hall. 1, Booth. E99** with their latest MT-6006 Amplifier and MT87-4 Fiber Speaker Cabinets.

• **Marands MT-6004** is a 600 Watts x 4 Channel Power Amplifier. Its reasonable

design and carefully selected fully automating production process ensure that the durability and stability of the product. Due to its short circuit protection and rapid response mechanism, it turns off the output power and cut off the input signal quickly. It features distortion burner unit to reduces the distortion. MT-6004 has strong and flexible frequency response curve and low-frequency extension. Its intermediate and high frequency is wide, smooth and full of tension.

• **Marands MT87-4** is a 15-inch two-way Fiber Cabinets loudspeaker box.

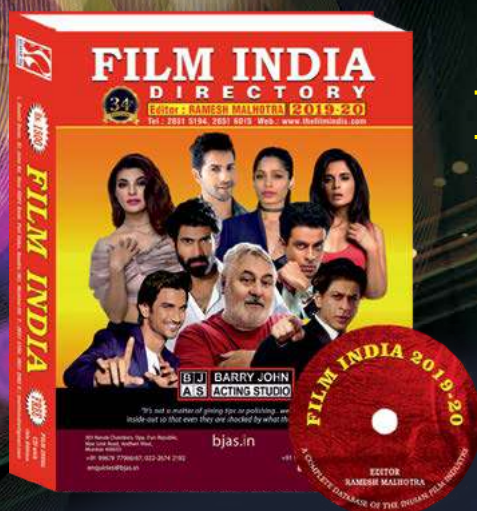

Marands MT-6004

Marands MT87-4

It is made of injection-molded polypropylene housing for light and for easy transportation along with perforated metal grill and trolley for an elegant look. It features speakon input and link connectors, rubber standing support and pole mount for comfortable transportation and fixed installations.

Ansata to Launch its Line of latest Products

Ansata Computer Systems Pvt. Ltd.

authorized distributors of renowned brands like Avid Technologies, DPA Microphones, d&b audiotechnik, Amphion Loudspeakers, Barefoot, RME, Waves, Sonnox, McDSP, Neyrinck, Shadow Hills Industries, Inward Connectors, Magma, Van Damme Cables and VSSP, will showcase a range of innovative solutions from their principles at **Booth. F19 & G19 in Hall 1.**

The company will launch the new DPA Microphone's 6066 CORE Headset mics, 6060/61 CORE lapel mics and d&b KSL line array modules from its SL Series.

DPA Microphones 6066 CORE Headset mics: This anatomically designed, ultra-miniature sized omni headset, with capsule diameter of just 3mm including the dust cap, make these mics one of the smallest in the world. Using CORE technology, the capsule offers wide dynamic range, vanishingly low levels of distortion so as to be as versatile as possible for various application scenarios. They are easily concealable

for various production needs yet offering uncompromising audio quality skin to large format mics and shotguns. Its Ruggedised kevlar cable and PVD coating to make it ready for the rigors of the real world.

DPA Microphones 6060/61 CORE lapel mics: These smallest sized lavalier mics available has subminiature design with capsule head diameter of just 3mm including the dust cap, making these mics one of the smallest in the world. Using CORE technology, the capsule offers wide dynamic range, vanishingly low levels of distortion so as to be as versatile as possible for various application scenarios. Easily concealable for various production needs yet offering uncompromising audio quality akin to large format mics and shotguns. Ruggedised kevlar cable and PVD coating to make it ready for the rigors of the real world.

D&b SL-Series: KSL: It consist of two different models - **KSL8 and KSL12** line

array modules which are specifically designed for medium to large scale sound reinforcement. Sharing the same vertical directivity, size, footprint, weight, rigging and driver complement, up to twenty-four KSL loudspeakers can be flown in vertical columns. Their 2-Way active design combines ingenious cabinet geometry with forward and side firing low frequency drivers, these couple towards the front, cancel towards the rear and increase low frequency headroom.

Also, the 80°/120° horizontal directivity pattern of the KSL8/ KSL12 is seamlessly maintained down to the lowest frequencies the loudspeaker produces, while the high output capability can cover a distance range of over 100 m (330 ft), depending on the climatic conditions.

The Inventory Display at PALM Expo

The Inventory, the distributors in India for the best brands in the world of music technology is all set to launch new products of their principal in **Hall no 1 at Booth C65.**

The lineup of new products on the display includes the following products:

- Dynaudio Core 59 & Core 7: This

reference monitor system can be the heart of any great studio. Each Core speaker has been engineered and built in Denmark to perform flawlessly in this high-stress environment, faithfully reproducing your sound as you create

it. These monitors are capable to reproduce exactly what was recorded- warts and all – so that the producers, engineers and musicians can listen the tweak to perfect their work. All Core monitors use Dynaudio's latest acoustic technology.

- **PreSonus Studio Series USB-C Interfaces:** This Studio Series USB-C 24-bit, 192 kHz audio interfaces comprises five different models: the Studio 24c, Studio 26c, Studio 68c, Studio 1810c, and Studio 1824c. These complete, all-in-one recording solutions update and replace PreSonus' first-generation Studio series and feature a USB-C connector. All but the Studio 24c include DC-coupled outputs for sending control voltages, and all five models offer MIDI I/O. USB-C to USB-C and USB-C to USB-A cables are provided for compatibility with most computers.
- **PreSonus StudioLive 32S:** It is a powerful 32-channel mixer that provides

the ultimate mixing experience, packing large format features into a small format chassis. Powered by the dual-core PreSonus FLEX DSP Engine, the StudioLive 32S is equipped with 40 mixing channels, 26 mix buses, and 286 simultaneous processors – including

four stereo reverberation systems, and Fat Channel plug-in models on every input channel and mix.

Along with the products above the inventory will also display an array of products from brands like Ableton, Arturia, AiAiAi, Audient, Dynaudio Professional, Eventide, Lauten Audio, Lewitt Microphones, Lindell Audio, Moog, Nektar, PreSonus, Rupert Neve Designs, Strymon, Ultimate Support, Waldorf and Warm Audio.

Theta Audio Pvt Ltd to Unveil New Products

Audio product manufacturer, **Theta Audio Pvt Ltd**, would be launching its line of products at PALM Expo 2019 in **Hall. 1 at Booth J88**.

Among them company's highlights would be their new **V-D13F Series**, an ultra-rugged platform that is built to address light to medium duty installation applications as well portable sound reinforcement applications while maintaining the performance and precision of its more powerful cousins.

The V-D13F Series features the next generation of Ultra-fast Analog computing for on-board zero-latency monitoring and control and is armed with the most extensive protection suite including total immunity to Open Ended Floating Voltages (490VAC Proof) that enables absolute

reliability of operation.

Occupying only 1U of rack space and weighing less than 6.5kg, the V-D13F Series minimizes its physical footprint across a wide range of applications and enables de-centralized deployability thereby reducing typical power losses associated with longer cable runs. The KNM Drive and the FPC class power converter together enables the V-D13F platform to achieve energy efficiency levels that challenge and surpass non-linear platforms across line and load conditions, thereby

reducing the overall operating and ownership costs.

Other features of V-D13F Series are:

- **Audiophile Performance with Active Damping**
THD < 0.0004% at rated output power;
Damping Factor > 2000
- **High Power Density**
Up to 2200W in 1U
Operable from 90VAC to 290VAC;
Efficiency > 90% across load and line
- **Ultra-Reliable**
490VAC proof; Extensive Zero-Latency Protection Suite

Vijay Enterprises Accentuates its Lineup of DJ Amplifier Stereo Mixer & More

Vijay Enterprises, known for their engagement in designing, engineering and manufacturing a wide variety of Public Address Systems under brand name Krown is all set to launch their **KPA-5000 DJ amplifier** and **KMX-12.2 Stereo Mixer** in hall. 1, Booth J88.

Krown KPA-5000 is a rugged and most

reliable dual channel (2500+2500W) amplifier. As per the company it sets a new benchmark for professionals requiring a sonically superior, high power amplifier. It has been designed to operate under stringent working conditions such as wide voltage fluctuations due to gensets/AC mains and high ambient temperatures. Adequate safeguards have been built-in to counter adverse working conditions. Ease of operation combined with service

accessibility has been optimized in the design. This product also features a Class H operation for optimum efficiency.

KMX-12.2 Stereo Mixer feature are mentioned below:

- **Input Channels:** Each Channel has separate XLR female & 1/4" balanced phone jack for Mic and Line & accepts both balanced & unbalanced signals.
- **AUX Control:** This controls the level of the channel in the final mix to Aux Send output.
- **AUX Send & AUX Return:** These have been provided for sending the pre-fader output of channels for monitoring or for adding a Special Effects Unit.
- **MONO/STEREO Output:** Mono output is available from either Left & Right output jacks when the switch is in 'Mono' position.

- Each channel has GAIN, BASS, MID, TREBLE, ECHO, PAN, and slide LEVEL controls with CLIP LED indicator.
- Echo section provided with Delay, Repeat & Level controls. Tape section for Record & Playback facility.

Custom Made Flight Cases Showcase at PALM Expo

Transcase, the manufacturer of top line cases from last twenty years, believes in ensuring that all cases leave their facility up to customer specifications, on time and ready for immediate use.

In **hall. 1, Booth C101**, Transcase would display cases for sound and Light equipment; Industrial Monitors;

Tool kits; Defense Equipment; Cameras; Rack Systems; Musical Instruments; Sports Gear; DJ Workstations; Medical Equipment; LCD; Tools; Transport and Travel cases.

These products are available in a wide range of colors, in commercial/ water proof ply, with aluminum extrusions, imported hardware & double angle/single angle sections to provide the strongest protection. Transcase products are the end result of extensive efforts and long experience, making it the first choice in diverse Fields.

WINDPRO 215A SPEAKER & EARTHPRO 118A SUBWOOFER TO BE SHOWCASED AT PALM EXPO

Pro sound and lighting solutions specialist **Sound Land** would be launching **Montarbo WindPro 215A** speaker and **EarthPro 118A** subwoofer in **Hall no. 1, Booth A65**.

Montarbo WindPro 215A speaker is an active acoustic loudspeaker designed to guarantee extremely high performances in terms of power and quality. 215A speaker features coaxial coupling of the high frequencies driver to ensure a coherent and transparent overall response, and an extremely linear 70° horizontal and 50° vertical coverage. Its Class-D amplifier features two high-efficiency channels, ensuring a 2400 W RMS total power that allows the speaker a 141 dB SPL with a 55 Hz to 18 kHz frequency response.

Montarbo EarthPro 118A, an active subwoofer is designed to guarantee extremely high performances in terms of power and quality. These subwoofers allow the range of WIND PRO models to be extended up to 28 Hz. The woofer, loaded in a 6th order Band-Pass configuration, guarantees a fast-powerful extended response at low frequencies. Its Class-D amplifier features a high-efficiency channel ensuring a 2400 W RMS power that allows the speaker a 139 dB SPL with a frequency response

Montarbo WindPro 215A speaker

Montarbo EarthPro 118A subwoofer

that extends up to 30 Hz. A complete range of integrated optional rigging Montarbo accessories allows the system to be installed in any situation.

Latest Line Array and Microphone to be Introduced by Star Audio Systems

Star Audio Systems are showcasing **SM-9100A** and **LA 210** at **hall no. 1, booth no. I81**.

The **Star Professional SM-9100A** is a dynamic multi-purpose microphone that can fit any singer's budget. The SM-9100A is a great microphone for a great price. Ideal for speeches, spoken-word presentations, karaoke, meetings, performances, multimedia, and instrument use and for numerous other events, the Star Professional SM-9100A includes a durable cable with 1/4" (6.3 mm) plug for use with home or portable recording/karaoke systems. The

unidirectional pickup pattern of the Star Professional SM-9100A microphone helps reduce feedback, while the wide frequency response and high output deliver excellent sound quality.

The unidirectional cardioid polar pattern of the SM-9100A helps reduce feedback, while the wide frequency response and high output deliver excellent sound quality.

The prime features are a microphone – which allows you to transmit or record sound and a 15' XLR-to-1/4" cable - for flexible use and placement.

The specifications include: Frequency Range: 40–13,000 Hz; Impedance: 400 Ohm \pm 30%; Sensitivity(0db=1v/pa at 1khz): -42 dB + 3dB; Pattern: Unidirectional; Connector: XLR-1/4" (6.3 mm) and Cable Length: 15' (4.5 meters).

Another highlight would be **Star Professional's LA -210**. It is a 2-way line array with two transducers and the new Directivity Correction Horn (DCH) which ensures the constant directivity in the high-frequency range. Waveguide Driver increases the output, sensitivity and also improves the directivity of

the low-frequency range. The high and of low-frequency neodymium magnet drivers integrate higher efficiency and power handling with reduced weight and dimension. Bass reflex enclosure has internal symmetrical heat-dispersion tubes

to prevent the system from overheating. It is thus especially designed for the fixed-installation touring, outdoor concerts, stadiums and for all the demanding sound reinforcement applications.

Sun Broadcast Pvt. Ltd. Brings the Latest in Mixers and Players

Sun Broadcast Equipments Pvt. Ltd. which represents the premium brands like - Tascam, Sony, Tektronix, Zeiss, Wacom, Nevion, Calrec, Tsl, Autoscrypt, Autocue, Sachtler, Litepanels, Anton Bauer, etc., would be displaying a wide range of products at **hall no. 1, booth no. G65.**

The highlights amongst these will be the latest **Tascam Model 24** which brings the best of mixers and interfaces. It is a full-featured 24 Track Digital Multitrack Recorder and 24 Channel USB Audio Interface with integrated analog mixdown capabilities. From stage to studio, the Model 24 helps

users to bring their music together in one easy-to-use device.

Another device on display will be **Tascam CD-400U**, a 1U-sized CD player, can play tracks from CDs, USB memory devices, SD cards and Bluetooth. It also includes an AM/FM tuner and remote control function provided by a built-in RS-232C connector. is suitable for a wide range of settings, from background music in small stores to use in public facilities.

Lighting Controller Debuting at PALM Expo

CODE Electronics Co. Ltd., which hold the position of being the first manufacturer for DMX lighting control equipment in China, will be bringing a series of products at **Hall 2, Booth No. C38.**

Their latest line of products will include the Lighting Controller **Victory 1** which has numerous features such as Maximum 8192 channels; 8 individual optical isolated universes and 2 Art-Net interfaces; 2 high-resolution 15.4" TFT-LCD touch screens; Up to 2400 playbacks controlled by 30 faders × 40 pages and 30 keys × 40 pages; Shape Generator which provides various effects; Built-in music player to trigger macro show record; over 8000 libraries in system; option to edit System Library or create custom Library; Provide MIDI In, Out and Thru interfaces; 2 USB 3.0 interfaces; 3.5 stereo audio output interface; AC100-240V, 50-60Hz power supply, etc.

Stage Lighting Display by CR Photoelectric Technology

CR Photoelectric Technology Co. Ltd. a professional company which is engaged in low, medium and high power stage laser lamp research and development, production, sales, rental, service, engineering design and installation is bringing its latest range of products that includes Stage Laser light; Architecture laser light; Stage LED light; Mobile DJ light; Home party light; Decorative light, etc. Visitors can experience these products at **Hall. 2, Booth No. D43E.**

Loudspeaker and Amplifier display by DE Acoustics Technology Co. Ltd.

DE Acoustics Technology Co. Ltd, a high-tech company specialized in researching, manufacturing and marketing of loudspeakers and amplifiers will be showcasing its new line of products at **Hall. 1, Booth No. H76**, which will include: **W-8601 Wall Amplifier - Model: HTL 3210SUB** - Dual 15" Subwoofer speakers having components as 15" speaker, 4"

W-8601 Wall Amplifier

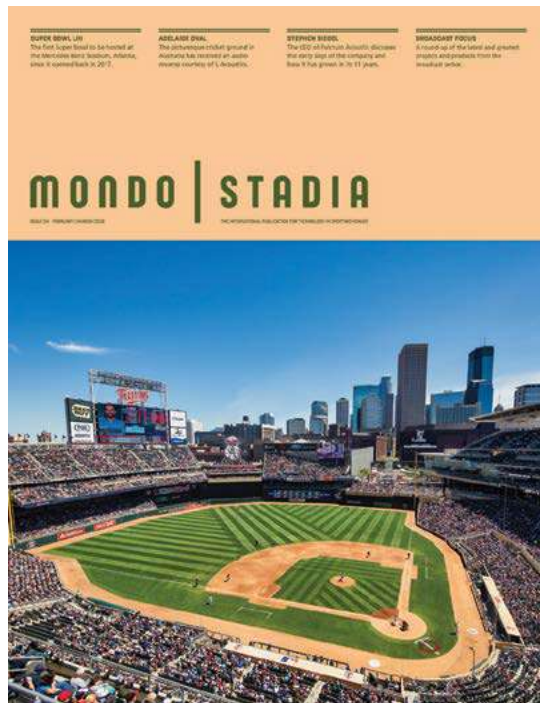

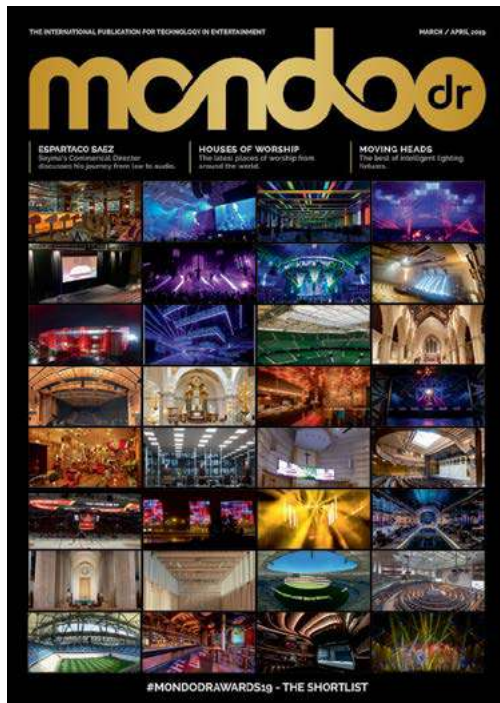

12" PA Speaker

voice coil; 35Hz-500Hz(-3dB) frequency range; 800W RMS, 3200W Peak Power; 100dB/1W/1M Sensitivity; and many more. and **12" PA Speaker - Model: PD-12** feature a 12" full range speaker drivers; 12" woofer speaker; 65mm voice coil; 1.75" tweeter; 44mm voice coil; 55Hz-19KHz frequency range; 300W RMS; 1200W Peak Power; 98dB/1W/1m sensitivity; 8Ω impedance; Max SPL: 123dB continue, 129dB peak; Coverage(H x V): 50°-100° x 55°, etc.

Deton Professional Sound System Co. Ltd.'s Power Amplifiers

Deton Professional Sound System Co. Ltd. is a China based professional power amplifier manufacturer company would be presenting their latest 2-CH,4-CH Entry & Mid-level Power Amplifier with best cost rate at their **booth G82 in hall 1.**

Latest Products Display Enping City Marteen Electronic Factory

Enping City Marteen Electronic Factory is known as the global manufacturing base of audio products especially for mixers and amplifiers in China from more than 20-year. Being R&D as their central focus they have successfully established a strong ability for ODM & OEM. The CE, KC certified company have ODM for many famous companies worldwide which was praised by their customers.

This year at PALM Expo Enping Marteen Audio Equipment Factory

will exhibit their best and high-quality CMS1000-3 mixer in **Hall 1, Booth H94.**

Power Amplifier by Enping BaoCheng audio Equipment factory

Enping BaoCheng audio equipment factory is known for engaging in designing and manufacturing professional power amplifier. They have also provided OEM service for many of their domestic and foreign companies.

This year at PALM Expo the company will display an array of amplifiers for the Indian visitors at **booth I96 in hall 1.**

Foshan City Shengse Stage Equipment limited Debuting Aluminum Truss & Stage

Foshan City Shengse Stage Equipment limited have been producing Entertainment event show equipment like aluminum lighting Spigot truss, bolt truss, fork truss, stage, barriers, lighting clamps, accessories etc along with technical service.

This year Foshan Shengse Stage Equipment limited would be debuting their Aluminum Truss, and stage in **Hall 2 at Booth B38.**

Aluminum truss is lightweight and easy to setup. It is used for various party and others outdoor & indoor show; other irregular shapes can be customized according to the customers requirement.

Aluminum stage is of 1.22M*1.22M/1.22*2.44M with adjustable height consist of stage board & frame,

brackets, pillars and base. There are anti-slip plywood and organic glass available for choosing with the loading capacity is 800kgs/m².

Latest Line of Speaker Voice Coil at PALM Expo

AUDIOSTAR ELECTRONICS CO., LTD., which is a professional R&D, manufacturing and selling company of speaker voice coil, is bringing its latest

line of products at **Hall No. 1 Booth No . G96.**

The highlight of the booth would highlight Voice Coil, which consists of various features such as Single Layer, 2 to 8 layer; Double-lead; Voice coil with inside and outside; Single-layer inside and Two-layer outside; Two-layer inside and Single-layer outside; Two-layer inside and outside winding; Bidirectional voice coil; Non-bobbin voice coil; double-bobbin voice coil; Flexible wire voice coil; High-power professional voice coil, Another special specification and high power professional voice coil.

Latest Line of Speaker Voice Coil at PALM Expo

Betterway Electronic Co. Ltd., which offers a wide range of products including more than 300 VHF/UHF wireless PA amplifier, along with wireless VHF/UHF microphones that are ideal teaching and training aids will be displaying its latest range of products at **Hall 1 Booth No. I93.**

The highlights of the range will be

the products such as wireless P.A. amplifier; wireless teaching podium; wireless microphone; wireless tour guide amplifier; wireless megaphone; wireless educational electronic instruments, etc.

Wireless Solution Sweden's Latest Transceiver Makes an Indian Debut at PALM Expo

Founded in 2003, **Wireless Solution Sweden Sales AB** is the world's leading manufacturer of the most popular, reliable and exciting Wireless lighting control equipment under the brand name **W-DMX** is coming to PALM Expo with their amazing product line up in **Hall 2, Booth C70**. The key highlights of the company's booth would be

their BlackBox F-1 G5 and Micro R-512 transmitter and receiver.

W-DMX BlackBox G5: It is the most popular of the series, using company's patented Adaptive Frequency Hopping technology to automatically avoid interference created by other wireless networks. G5 supports 2.4GHz, 5.2 GHz and 5.8GHz frequency bands. These triple-band units have full RDM support in transceiver models, where even the most complex installations can be configured wirelessly. The simplicity of the technology makes possible to configure an entire wireless network in less than 10 seconds.

Micro R-512 G5: This Micro series are the most compact, battery-powered, W-DMX transceivers and receivers available on the market today, with all the features

of the popular BlackBox, excluding Triple Band Technology. Micro products are built into a rugged slimline casing with USB power, and mounting options for a variety of locations and structures. The Micro is ideal for smaller events and venues, where space is a concern.

Foshan Nanhai LB Stage Equipment's New range of Products

Foshan Nanhai LB Stage Equipment Co. Ltd. would be launching their Aluminum truss & stage in **Hall 2, Booth C31B**.

Aluminum truss: size :

300x300mm, 400x400mm, 350x350mm, 450x450mm, 500x600mm, 520x520mm, 520x760mm, 600x760mm, 600x1010mmx650x1010mm, aluminum

alloy 6082-T6, main tube 50*3mm, brace 50*3mm, zigzag brace 30*2mm.

Aluminum stage size :

1.22x1.22m, 2.44x1.22m for one platform, 50*3mm main tube, 30* brace, 18mm plywood, glass, acrylic for option, Aluminum scaffolding: size 1.35*2m, 0.75*2m, adjustable height, guarantee by CE certificated & TUV ISO9001.

Wireless Monitor to be Showcased at PALM Expo

Established in 1997, **Enping Zhongpu Electronics Co., Ltd.**

the professional manufacturer of microphone including designing, developing, producing and sale of the product. The company is situated in Enping City, Guangdong Province covering more than 2000 square meters.

This year in **Hall 1, Booth F81** at PALM Expo company would be launching new professional high-quality In-ear wireless monitor with stereo UHF for stage performance.

Yugal Audio lunches Potentiometers

In **Hall 1, Booth F100** Yugal Audio the distributor of some renowned brands like Apai, Jimson, Usonic, Djplus, Masteramp, Studioman would be launching Apai Potentiometers which is used to measure the electric potential of audio components. Another product is Jimson Audio Capacitors use in Passive Crossover for Audio Filtration.

Moving Heads Innovation Display at PALM Expo

Guangzhou Ever Famous Electronic company Co. Ltd. is well known for its constantly making the quality products is coming to the PALM Expo this year in **Hall 2, Booth D40** with a variety of led moving head light and led par light.

Technology Analysis

Application Features

Latest Innovation on Display by Yamaha Music India Pvt. Ltd

Yamaha Music India Pvt. Ltd. is part of the Yamaha Corporation worldwide group of companies and offers full line of Yamaha musical instruments, Pro audio- and Audio-Visual equipment to India market.

This year at PALM Expo the company would be showcasing two latest products namely **Nexo Geo M12 Line array** and **Steinberg AXR4 Thunderbolt Audio Interface** along with a lineup of **YAMAHA products** in **Hall 1, Booth F84**.

- **Nexo Geo M12:** It is a compact line array system with easy AutoRig integral rigging system which automatically connects the speakers from the front rigging points when they're assembled together. Geo M12 comes in two variants, giving users the option of 10° and 20° of vertical dispersion. Moreover, users can easily increase the horizontal dispersion of the speaker by using the magnetic waveguide flanges from 80° to 120°.

Speaking of ease and versatility, the Geo M12 gives you the option to switch from a 2-way Passive mode to 2-way Active mode with a mere flick of a switch at the back of the speaker, on the go. It uses a patented V-shaped profile for its bass port to increase low frequency efficiency and linearity even at high power. The Geo M12 can achieve a frequency response of 50Hz to 20kHz and a nominal peak of

140 dB SPL with its 12" long excursion Neodymium driver equipped with a patented Phase Directivity Device and a 3" voice coil 1.4" throat driver on a patented Hyperbolic Reflective Wavesource which creates a virtual wavesource 'outside the box', resulting in optimal wavesource coupling without destructive interference. You can get a flexible system with the same accessories, making the switch from hanging the speakers to ground stacking all the easier.

- **Steinberg AXR4 Thunderbolt Audio Interface:** It features four Neutrik combo inputs and two individual headphone outputs on the front side. On the rear panel are eight TRS line inputs and eight TRS line outputs alongside two pairs of ADAT I/O doubling as S/PDIF, the second of which provides an alternative AES/EBU Sub-D connector. The MIDI input and output next to the word clock I/O featuring advanced SSPLL (Super Suppression Phase Locked Loop) jitter suppression round out the many connectivity options available to the AXR4. Two Thunderbolt 2 connectors provide ample throughput for ultra-low latency recording, connecting to the computer and for daisy-chaining of up to three interfaces.

The design of the AXR4 interface is centred around delivering exceptional audio quality. With a 32-bit integer resolution as well as a maximum sample rate of 384 kHz, this audio interface is like no other,

setting the standard for future music productions. Its four studio-grade hybrid microphone preamps deliver a very natural sound owing to the refined transformer circuitry and Rupert Neve Designs' SILK processing, accurately modelled by Yamaha's VCM (Virtual Circuitry Modelling) technology.

Another prominent highlight is the inclusion of Yamaha's DSP effects for latency-free monitoring: the VCM 276 compressor, the VCM EQ601, the Sweet Spot Morphing Channel Strip, and the REV-X reverb, a complex reverb algorithm renowned for its superb sound quality.

Any DAW can be used with the AXR4 by harnessing the power of the dspMixFx AXR mixing application, providing easy routing and setup of the 28x24 matrix mixer and monitoring without any latency when using the included effects.

"With its selected components and renowned SILK processing by Rupert Neve Designs, our AXR4 interface considerably raises the bar in audio quality. The comprehensive input and output options make it the perfect choice for ambitious musicians and producers of project studios and larger recording facilities.

Enping Sounder Electronics Factory Presents Digital Power Amplifier

Sounder Electronics Factory would be displaying Digital high-power amplifier which are suitable for performance, KTV and business advanced entertainment field in **Hall 1 Booth F84**.

The power of these amplifiers ranges from 600W to 1500W, 8 ohms. It features unique circuit design for perfect protection circuit. The TFT display panel and clear working state of these amplifier enable them to process work easily and stably under any circumstances.

Grand Van Audio Co. Ltd Debuting Audio Range

Founded in 2010, **Grand Van Audio**, is a "one-stop service" enterprise that design, manufactures, marketing professional audio speakers. This year in **Hall 1 Booth G75** the company would be displaying multi-type product lines, including multimedia audio, professional audio, consumer audio and communications audio systems.

Laser Biggest Manufacturers at PALM Expo

Laser specialist Golden star laser Technology Co. Ltd. was established in 2008 and now from more than 10 years of experience has become one of the biggest laser manufacturers in China. They have around 50 employees with their own CNC workshop to produce metal parts for our laser module and laser case.

balance.

This year at PALM Expo in **Hall 2, Booth C31D**.

Golden Star Laser would be displaying **30W RGB, 20W RGB, 15W RGB laser lights**.

These compact size laser light feature built-in Pangolin FB4, low noise fans, 1mrad tight beam, 100K modulation frequency, digital driver, work in 40 and up to 40 degree temperature, High stability and good white color

Variety of Amplifiers to Launch at PALM Expo

In hall. Booth. Guangzhou Fedaxy Audio Electronic Technology Co. Ltd. would be launching Amplifier FC50 with Class H circuit and 2U- 4 Channel. Another product in display will be Amplifier MJ800 switching power amplifier with metal tube transistor to make the sound clear and sweet.

High Performance Digital Conference Product at PALM Expo

Professional developer and producer of large-scale enterprise conference system, **Hong Kong MCMYK Electronic Factory Group** would be launching **MC9170 Hand in hand conference system and MC200-2** Professional speech wire microphone along with their numerous products at **Booth H75 Hall 1**.

MC9170 Conference System: This high performance, low cost, ultra-streamlined equipment can be used in any hall, hotels, banks,

conference speeches etc.

corporate conference rooms and large international multilingual conference center.

MC200-2 Professional speech wire microphone: It features built-in large-diaphragm condenser; heart-shaped directional pickup head; ultra-distant pickup distance; high pickup sensitivity, and excellent sound quality. This product is suitable for applications such as press conferences,

Latest Products Display for Lighting Industry

Guangzhou hong wang lighting equipment Co. Ltd. was established in 2007. At first the company was mainly into producing LED stage lights but gradually expanded their scale of production with the addition of developing area of 42,000 square Meter along with the production area of 25,000 square Meter.

This year in **Hall 2 at Booth C31C** the company would be displaying their lineup of moving head and Logo lights for the Stage.

PCB with 3in1 diodes to be launched at PALM Expo

Guangzhou Anlan Optoelectronics Technology Co, Ltd specializes in high power LED light encapsulation has its own professional skills in LED light encapsulation area. The company have experienced modern enterprise management personnel and LED industry elites, who have set up a complete and scientific quality control system for the company and have enhanced our ability in R&D, production

and marketing. We have advanced modern automatic production equipment.

In **Hall 2, Booth D75**, this year Guangzhou Anlan Optoelectronics Technology Co., LTD would be launching their good quality PCB with 3in1 diodes. It features good flare radius, low light decline, high-luminance, high-color-rendering index, consistent light color. This product is best suitable for stage lighting and lighting field.

Guangzhou hongkai electronics co. Ltd. to Launch Power Supply Products

Guangzhou hongkai electronics co. Ltd. is a company specialized in manufacturing, researching and developing different types of power supplies equipment and generators. The company's products are highly popular in America, Europe and other foreign countries.

In **hall 2 Booth B39** at PALM Expo Guangzhou hongkai electronics co. Ltd. would be launching their entirely new range of power supply products for Indian market.

Guangzhou Hongsheng Electroacoustic Co.Ltd. Debuting Speakers

Established in 2005 the professional speaker manufacturer **Guangzhou Hongsheng Electroacoustic Co., Ltd.** is located in the Capital of China, Huadu District of Guangzhou City.

The company would be unveiling their lineup of speakers among them the key products will be

18-inch Speaker featuring 250mm magnet, 5" voice coil, 1200w, 97dB, 35-2000Hz. Another product on display will be 15" Speaker featuring 220mm magnet, 4" voice coil, 600w, 98.5dB, 40-2300Hz.

The visitors can experience these products live at **Booth H93 in Hall 1.**

Guangzhaou Huofeng's Latest Range of Moving on Display

Guangzhaou Huofeng in **hall 1, booth D38** would be displaying different models of moving heads which includes 260w beam light, 350w beam light, 440w beam-spot-wash light, 230w beam light, 80w led beam light and 4x100w cob blinder light.

Guangzhou Tianzhe Electronic Technology Co., Ltd to Launch New Products

Guangzhou Tianzhe Electronic Technology Co., Ltd would be launching D Series Power Amplifier and 32 Way Digital Mixing Console DM32 along with many other products in **Hall 1 booth G83.**

D Series Power Amplifier: This is the perfect HI-FI level digital(D type) professional stage audio frequency power

amplifier which sell well over Europe and America market for many years. It is applicable to large scale performance, senior club, bar, KTV, and show excellent effect in the all occasions.

32 Way Digital Mixing Console DM32: It is a 32-way signal input (24 way MIC; 2 group stereo; 1 group return; sound card / MP3 and optical fiber) with Input processing-input gain adjustment (electronic gain) preamplification, high and low pass filter, 4 segment parameter equalization, compressor, noise gate, delay, input channel sound and image balance adjustment.

Innovative Lightings for Indoor Applications at PALM Expo

In **Hall. 2, Booth D76** Guangzhou Lightful Stage Lighting & Sound Equipment Co.,Ltd. manufacturer of moving head laser, laser bar, animation laser, outdoor performance laser which

have been applied widely in club, theatre, electronic music festival and open air stage would be launching their products for both indoor application.

The display of the products would comprise 6W RGB animation laser bar consist of 6 lens RGB animation laser with compact structure design. Each lens can run synchronously with neat effect and can be individually controlled. This powerful laser bar is best suitable for indoor medium events, concert and theater.

Another key product will be small size and light weight 10W RGB animation laser. This laser is easy to carry for installation and can be perfectly fit with all kinds of rotating light truss.

17R Moving head beam Debuting at PALM Expo

GUANGZHOU YESLIGHT CO. Ltd. to display was established in 2003. They are known as the professional manufacturer and exporter that is concerned with the design, development and production of Stage lighting products.

This yeat at PALM Expo in **Hall. 2 at Booth no. D78** would launch their 17R Moving head beam for stage lighting.

Passive Speakers at Display

Professional audio manufacturer of Professional Power Amplifiers, Speakers, Karaoke Equipment, Conferencing systems, Professional peripheral Equipment, Microphone Series

and Sound Mixers - **Guangzhou YunQiang Electronics Co. Ltd.** would be displaying their lineup of Speaker, Passive speaker and Multi-loudspeaker at PALM Expo in **Hall 1 Booth G74.**

Innovative Stands Range Unveils at PALM Expo

IA Stands known for building ground-breaking technology of Stand + Mount will be displaying their range of products at their **Booth D81 in Hall 1.**

The new range of products includes multifunctional **Tripod stands** which comes with a distinct feature of interchangeability which allows you to attach any mount i.e. mic mount/guitar mount/notation mount/laptop or tablet mount and switch mount as per your convenience and need of hour with the liberty to completely transform the utility of stand from one to many. Tripod being a multi-purpose heavy duty stand is designed with cross strips which elevates the strength and weight bearing capacity of stand. It closes to a compact

form making it highly portable and travel friendly.

Another product in line is **Tripod Boom** designed a 2 in 1 Tripod Boom, wherein the utility of mic stand is now not just restricted to hold microphones. Our revolutionary design of telescopic boom where we have used minimal parts to create a unique feature of having boom arm extend laterally and then making it disappear by putting it back in the main frame, which makes it an enormous space saver. The compact design and lightweight build of Tripod Boom makes it portable and easy to carry.

With these the company will also unveil **Mic Mount** which can be used in varied

combinations by easily switching over to different Stands and Extensions creating endless possibilities of using the product and notation Mount the only Notation Mount in the world which can be used with multiple Stands and Extensions.

The exhibitors will also get a chance to see **Laptop/ Tablet Mount**

to hold laptop and tablets. The design of this product is deeply connected to our name i.e. IA (Innovation + Art). Users can open the arm in 'I' posture it grasps tablets and iPads and when the arms are switched over to 'A' posture it holds all Laptops and Netbooks. This immensely collapsible mount is one of the most compact and smallest mount around in this domain.

Last but not the least **Keyboard Stand.** As the name suggests X-16 is an X style keyboard stand with an unprecedented 16 position locking mechanism. Its snap lock lever can be used by you, just by single flick of your finger. Embracing the openness of IA Ecosystem, X-16 can be used with all our mounts i.e. notation mount, mic mount and laptop/tablet mount and extension. Our patented design of unibody Triangle T-bracket draws inspiration from nature which closely resembles whale's fluke. Unlike conventional joints made from metal bolts and metal welding, which add a bit of inconsistency in due course, our Triangle T-bracket made from heavy duty plastic has the capability to take high impacts and heavy load and still maintain its functionalities.

Enping Hong Lang Electronics Co., Ltd. to Unveil Professional Speakers & Power Amplifier

Enping Hong Lang Electronics Co., Ltd. has a number of high-quality professional, research and development and production is all set to launch their lineup of Professional Speaker and Power Amplifier at PALM Expo in **Hall 1 Booth H84.**

Jiangmen Chuanqi Technology Co., LTD. Presents Active Amplifier

Jiangmen Chuanqi Technology Co., LTD. use high quality parts sourced from world over is all set to launch their PDA1000 speaker feature and PDA2600 Big power amplifier module Digital amplifier module amplifier at their booth G84 in hall 1.

World's First Throwable Microphone for Conference & Meeting Made its Debut at PALM Expo

Surabhi Trading Corporation would be launching Catchbox Throwable Microphones at their **Booth___ in hall___**. These soft, cube-shaped microphone, designed to be thrown from one participant to another. It works well for conferences, meetings, workshops and lectures - basically any event where the audience can ask questions and give feedback. Catchbox is great for breaking down barriers and formalities to encourage contribution and make it fun to get involved.

This year at PALM Expo the company will display Catchbox Plus, a complete wireless microphone system with increased coverage and rechargeable Li-ion battery for both large and small events. It allows users to connect two Catchbox transmitters to the same receiver simultaneously. The user can also add wireless Charger for

easier charging. Other features of Catch Plus are; Audience size up to 1000; Range up to 100m / 328ft; 14h Battery life and Frequency: DECT 6.0 (USA), and DECT (EU and other regions).

Another highlighted product will be Catchbox Plus Presenter Mic. It's a wireless belt-pack microphone for individual use on stage as Presenter Mic is compatible only with Catchbox Plus product family. It connects wirelessly to the Catchbox Plus Receiver - making it possible to operate both an Audience Mic and the Presenter Mic from the same Receiver.

There are several ways to wear Catchbox Plus Presenter Mic. Users can wear it around their neck using the lanyard. The best speaking distance using the built-in microphone is 20 cm or 8". Users can also attach it to their cloth.

In case of more movement on the stage it allows users to connect it with the Presenter Mic to a headset.

Catchbox Plus

With the products mentioned above the company would also be displaying Catchbox LITE standalone wireless microphone system and Catchbox MOD which has a covering range of up to 90m/300ft and works with your event audio visual setup.

XLR Connectors Debuting at PALM Expo

ZWEE Industry (HK) Co. Ltd. was established in 1992, with a long history about 26 years. The company has expanded and now have two factories, five sales centers and along with different Group companies located in South Korea, Hong Kong, Shenzhen, Dongguan and Zhejiang.

With the total area of about 20,000 square meters, the company have more than 500 people as their employee, including engineering and technical

research and development.

This year the company will display their wide range of **XLR cable connectors** in **Hall 1, Booth F82**. These connectors are easy to assemble, simple to use, excellent cable protection, reliable and robust.

Innovative Switchers, Amplifiers and Active Speakers Demonstration at PALM Expo

A high-tech professional audio manufacturer **Regal Technology Co. Ltd** was established in 1997 in Guangzhou, China. The company produce their own products under brand name Regal Tech particularly focus on R & D and to provide quality products.

In **Hall. 1, Booth. F83** Regal Technology Co. Ltd would be demonstrating a range of products which includes DLP4084, DLP4800, DLP0808

and DLP1616 Digital signal processors. Along with this the company will also display different models of **Switching Power Amplifiers, Amplifiers with DSP, DSP Power Modules for the active loudspeakers, Active Speaker with DSP and Coaxial triple frequency active speakers.**

Transound Electronics Co. Ltd. to debut their latest Microphone, Speaker and many more

The professional global supplier of miniature components and electro acoustic series solutions, Transound Electronics Co. Ltd. would be debuting their latest products in **Hall 1, at Booth G73** in PALM Expo.

The visitors can also see the latest lineup of the company which include products like Microphone, Speaker,

Earphone / Headphone and Mems Microphone.

Lighting Console Display at PALM Expo for Lighting Designer

Sightly Electronic Technology Co.,Ltd.

are the professional manufacturer of stage equipment, with more than 2000 square meter workshops and professional developing, production and sales team.

The company would be debuting their **TGT Super Double Screen Tiger Touch** and **ET Pro Expert Double-Screen Lighting Console** at their **Booth C31A in Hall 2.**

TGT SUPER Double Screen Tiger Touch Lighting Console Features are:

- Powerful Titan operating system
- High-class alloy, unique dazzling appearance design
- Intel Core Dual processor, 128G solid state drive, 4G memory.
- Two 15.6-inch touch screen can program more lights
- The screen can be folded forward, small size, light and flexible
- Multi-lingual User Interface on screen MENU display, including English, German, Spanish, Portuguese, Russian, Polish, Japanese and Chinese
- 12 DMX512 universes, 6144 channels Support for ArtNet extension, up to 64 DMX outputs
- 10 macro buttons could edit any program
- 20 playback faders support for 1000 virtual playbacks
- Powerful CMY or RGB palette
- Built-in thousands of personality files and editing software
- Built-in Visualizer software, support for

video

- Provide MIDI timing code control, playback buttons or faders could be remote controlled by MIDI
- Built-in pixel mapping and pattern generator
- Built-in WINAMP music player, could trigger procedure by music
- Record time code, you can play the program every day fixed time

ET PRO Expert Double-Screen Lighting Console Features are:

- Intel Core Dual processor, 128G SSD Drive, 4G memory
- Built-in UPS, to protect unexpected power outage
- Multi-lingual User Interface on screen MENU display, including English, German, Spanish, Portuguese, Russian, Polish, Japanese and Chinese
- Built-in Visualiser software, video supported
- Particular dual-roller program shelf can switch over the programs flexibly
- 60 preset faders can patch fixture, store program and swop control, 20 program playback faders, totally 80 SWOP faders, all can play back the program
- Built-in solid-state hard disk, can read and write, and USB flash disk can also store data information
- Ethernet output, compatible for ArtNet and ACN Standard Protocol 12 DMX 512 outputs, 6144 channels
- Built-in stretchable qwerty keyboard and

touch mouse

- Built-in fixture library generator and built-in automatic generation of light simulator
- Built-in 2 touch screens of 15.6 inches, adding common window select buttons
- 10 micro buttons, window control buttons and 3 attribute control wheels can increase the flexibility of the windows for the fixture, fixture group, color, location, pallet, etc.
- On the basis of powerful function of Expert itself, adding all common shortcut keys on the panel of Touch Tiger
- Built-in WINAMP music player can trigger program by music

Ring Magnet & Speaker Trolley B.L.K Ferrites Pvt. Ltd.

B.L.K Ferrites Pvt. Ltd. is a one-stop descriptive solution to fulfill all the requirements of magnets which includes a wide range of whether it is the requirement for alnico or ceramic magnet. They have read stock of all the products, having elevated magnetic field strength that does not squander under ordinary circumstances, also these are available with in varied specifications, as per the customer requirement.

The company will be launching their Ring Magnet for Speakers comprises Y25, Y30, Y35 models in **Hall 1 at Booth H100.** Another product will be wooden Speaker Trolley.

Soundking Unveils DM-4/DM-8/DM-16 Digital Mixer

Soundking global corporate group that dedicatedly engages in R&D, manufacturing, sale and international trade service of audio equipment, digital cinema system and related performing equipment has announced the launch of their DM-4/DM-8/DM-16 digital mixer at PALM Expo.

Key Features of DM-4/DM-8/DM-16 digital mixer are as follows:

- PC/iPad/Smartphone remote control
- Multiple control via wireless network and ethernet, compatible with iOS, Android, Windows, Mac, OS and Linux device

- Input channel supports phantom power, 4 band PEQ, high pass filter, compressor, effect and noise gate
- Output channel supports reverb, delay, and 8 built-in effects
- 2*USB (stereo recording, playbacks/system update/scene storage)
- 25bit/192KHz ADC/DAC
- 60dB MIC pre-amp
- 4AUX, 1 stereo out
- 4 assignable output
- 4 built-in effects
- Support scene memory

Latest Speakers Voice Coil from Dass & Company

Established in 1951 **Dass & Company** would be launching its full range of Speaker Voice Coil Material and HF Tweeters under their brand Yashica at their **booth - K81 in hall no. 1.**

The highly acclaimed Yashica Speaker Voice Coil Material comprises of three different units namely Voice coil former material, Voice Coil Taping Paper and Voice Coil Wire.

- Voice coil former material includes different types of coating like self-bonding tile, self-bonding kapton, self-bonding aluminum, self-bonding paper, self-bonding black aluminum, etc. It features TIL TSV Coated Brown; Kapton SV Coated; Aluminum SV; TIL/Glass Fiber /SIL Yellow; Kraft Paper SV; Black Anodized Aluminum SV; TIL Paper; Kapton Paper; Glass Fiber and Black Coating for Voice Coil.

- Voice Coil Taping Paper material comprises Natural Kraft; Double Side Coated Natural Kraft; White reinforcement Paper - Cequin /TKB; Pinkish Reinforcement Sanka; Black Coating; Black Kraft- Several Types; Double side coated Black Kraft; Creamish Reinforcement Sanka and Flat Connector wire.

- Voice Coil Wire high-quality Copper and CCAW wires manufactured specifically for the Voice Coil Industry and cater to both OEM and aftermarket/repair demand.

Another product is High quality imported HF tweeters with a wide range of voice coil diameters with an impedance of 8 ohms using titanium diaphragms and Y30 Strontium Ferrite Magnet with 7-8

Voice coil former material

mm heavy duty T-Yokes. It features YA-450 Deluxe (voice coil diameter 44.4) CCAW; YA-550 Deluxe (voice coil diameter 51.2) CCAW; YA-750 Deluxe (voice coil diameter 72.2) CCAW; YA-850 Super (voice coil diameter 72.2) CCAW and YA-D26 (voice coil diameter- 25.4) CCAW.

Candescent Bright Stage Lighting at PALM Expo

A registered brand in China, Hong Kong, and India- **Candescent Event & Media works Pvt. Ltd.** lighting would be showcasing series of the professional stage moving lights, beam lights, laser lights, LED lights, strobe light, stage special effect equipment, dimmers and so on in Hall. 2, Booth A81 & B81.

Among them, the company highlights will be **CAN-COB-AB-400 is a 4*100W COB LED Audience Blinder Stage Light.** The technical specifications of the product includes: Input Voltage: AC100-240V 50-60 Hz; Power: 400 W; Light Source: 4pcs 100W Warm White Cool White(WW/CW) 2in1 COB(Chip on board) LED; DMX Channels: 1/2/4/8CH; ControlMode: DMX512,Auto,Master/Slave,Sound active; Color Temperature:

3200K(Warm White),6500 K(Cool White); Strobe: Electronic; Strobe Rate: 0 to 30 Hz; Beam Angle: 40° and Data Connectors: 3-pin XLR(5-pin optional)

Another highlighted product would be CAN-NW-5403-3/1 is a 54*3W RGB 3-in-1 LED Par Light. Its technical specifications include Rated Voltage: AC100V-240V, 50HZ/60HZ; Rated Power: 180W; Light Source: 54pcs 3W RGB (3in1) LED; Display Interface: Digital display; Control: Display control, Auto/customer control. Signal: DMX512 signal, built-in auto

CAN-NW-543-RGBW (With Remote)

CAN-COB-AB-400

program, with the master/slave; Channel: 7 DMX channels; Cooling System: intelligent fan control, No noise; Chassis: Die-casting aluminum and Dust mirror: steel glass.

These lighting equipment is widely used in stage, ballroom, radio, television, weddings, parties, opera houses and other places of entertainment.

More Energy Plugins Display at PALM Expo

Yash Enterprise, renowned distributors, traders, and importers of an extended collection of Industrial and Electrical Instruments would be launching their latest products from their principal brands in **Hall 1, Booth G100**.

A key product on display will be **CEE-plugs and connectors**: Industrial plugs and sockets from 16A to 125 A are often subjected to the most extreme

stresses. They must function reliably despite contamination and wet conditions. Conventional CEE plugs and sockets were always a compromise between operating convenience and contact quality. X-CONTACT from Mennekes now presents a system in standards IP44 & IP67 that combines the utmost reliability of the electrical connection with the utmost operating convenience. Secure contact

and simple handling are now at the same high level, even at currents of 63 A or 125 A.

Receptacle combinations in Polycarbonate Enclosures

will also be a key highlight. These enclosures ensure safe distribution on-site with a robust enclosure made of ABS or polycarbonate in standard

color grey RAL 7035, available with plain sides or with metric knockouts. Customized solutions are available in these enclosures of varied sizes with CEE plugs and sockets Schuko, RCD and CB switches, switch-On/switch Off elements, load-break switches, energy meters or energy measurement systems in line with the requirements.

Also on display is the **Distribution Box In Evergum**, which is Robust & available in Colour – signal yellow & black, material PE, Standard EN60439-4, IEC 80529, Protection Grade – IP67, IP66 waterproof & UVB Resistance, Max for 12 P, 24P & 36P. The installation of SCHUKO, receptacles equipped with protective switches, RCD devices, and circuit breakers are in-line with the requirements of the customers. Should the need arise, this saves the time-intensive trip to the main distribution & can be made available with or without supply cable.

PROMEDIA to Launch Tactical CAT 6 Cable with Reel

Promedia, leading supplier of connectivity products, i.e. Cables, Connector, Patch-bays, Microphone Stands, Gooseneck & Rack-Lights etc. would be debuting Tactical CAT 6 Cable with Reel first time in India at PALM Expo in **Hall 1 at Booth D95**.

Tactical PROLINK-AV Cat 6 cable with Reel comprises of Tactical cat6 cable with Neutrik Ethercon Connector on Cable Drum; Bare copper 24 AWG; 4 Pair with Blue/White Blue, Orange/white

orange, Green/White Green, Brown/white Brown Core Colors; Grade: Outdoor UTP Twin Jacketed Cable. These cables are best suitable for Sound Rentals, Live, Lights and LED/Video Wall.

PROLINK-AV Cat 6 cable with Reel

Trimac Products Private Limited to Unveils Latest Products

One of the leading names in the professional audio industry - **Trimac Products Private Limited** is all set for their multi-launch at PALM Expo 2019 in **Hall 1, Booth D95**.

Among this line-up of products, the company highlights would be Denon Prime 4 and Wireless Go.

Denon Prime 4 is a 4-deck standalone DJ system with 10" touchscreen. Its multicore processor makes the entire music collection available, with no laptop needed, transparently connecting the into their performance. With 4-deck hardware control and advanced touchscreen workflow, users are all set to handle any DJ set,

Denon Prime 4

anywhere, anytime.

RODE Wireless GO: The wireless GO is the world's smallest, most versatile wireless microphone system. The transmitter works as both a clip-on mic or as the world's smallest belt-pack for a RODE lavalier, sending crystal clear broadcast-grade audio via 2.4GHz digital transmission to the ultra-compact on-camera receiver.

Wireless Go

Outdoor & Indoor LED Display Solutions from Videowall India

One of the most fetching marketing media - LED displays to be showcased by Videowall India, established in 2007 is India's first choice of experts in LED display solutions for live events on a prodigious scale to indoor projections for large scale enterprises, government agencies or start-ups.

In hall____, Booth _____ the company would be showcasing a new series of the indoor and outdoor display - VODpro and VIDpro, feature multi-input (HDMI, DVI, SDI) and 360 Degree rotation. They are specially made for banks, retail stores, stations, hospitals, theatres, government organizations etc.

VODpro Series is principally meant for outdoor display where the viewing distance is less and needs high brightness (up to 6500 nits) to see a clear picture in direct sunlight. This series comprises of - VODpro - 3, VODpro - 3.8, VODpro - 4 and VODpro - 5.

It comes in stand-alone (360-degree rotational facility available) and wall mounting fittings. The potential market for this series includes; petrol pumps, outside retail stores, banks, street advertising, street light poles, etc.

VIDpro Series is principally meant for indoor display where the viewing distance

is less, and brightness is up to 1500 units for high definition quality of resolution. It comes in a standard as well as customized size in four different models - VIDpro- 1.6; VIDpro- 1.8; VIDpro - 2; VIDpro- 2.5 and VID pro - 3.

This series comes in stand-alone (360-degree rotational facility available) and wall mounting fittings. The potential market for this model includes; Hotels, hospitals, chain stores, government organizations, corporate offices, reception areas, etc.

VID PRO LED Screen

Another newest product on display will be the Hydraulic Mobile Display Truck. Videowall India has India's largest mobile display LED fleet with a mammoth amount of 32 Hydraulic vehicles. Few of its distinctive features include; inbuilt generator, audio of 2400 watts, air-conditioned cabin, 7 by 20 feet in built stage, GPS, Hydraulic 360 degree rotation,

VODpro LED Screen

Control unit, wireless remote operation, Hydraulic Lifting up to 20 feet above the ground, 4 Hydraulic support jacks and Screen 4mm pitch Nation Star. This is a 100% customized and in house product, which is now becoming an efficacious mobile promotional media which can be utilized in government organizations as well as public organizations and is also useful in individual and corporate firms in order to showcase their products, inventiveness and future prospects in front of a swarm of individuals. It has been making rounds in umpteen cities and towns as well as villages including extreme rural territories sans electricity provisions. Due to the product's high marketability, Hydraulic trucks have also been exported overseas and have been in demand ever since.

Pope Professional Launches Live Sound Products at PALM Expo

POPE Professional Acoustics Ltd which provides manufacturing, design and installation services to wide range segments which include places of Worship, Auditorium, Seminar Hall, Conference Hall, Discotheques and Live Sound will be showcasing a range of products at their booth In hall no.....

The company is constantly innovating and launching a minimum of twenty plus new Products every year. Recently the company has developed a new AC Series compact powered line arrays and sub-woofers to attract sound rental companies.

For the installation and small segment sound reinforcement, Pope Professional has developed the MP Series multipurpose powered sub-woofers with two way and three-way output to power up the

full-range system.

Also, the news is the **M Series**

Powered 12", 15"-point source coaxial monitors and **TH-800 Series** Powered full-range system for small indoor and outdoor events.

POPE Professional's Managing Director added that all of the speaker, sub-woofer cabinets, hardware, and drivers are Made in India under one roof, while not compromising on quality and following international standards.

For the aesthetic look and reliability of the products, POPE Professional is using SoundFlex Polyurea based environment-friendly coating.

In the sound industry, POPE Professional is one of the leading brands in India, catering to the requirement for any application in the field of professional sound.

The manufacturer also announced a price reduction for its 19 model's speaker & sub-woofer beginning April 2019.

BLOW YOUR MIND

Immersive Audio Creation, Production & Reproduction via Headphones

For cost-effective, high-quality multi-channel mixing, sound-track proofing, off-site proofing & home-studio's

(Direct from Kickstarter USA, New Product Launch in India!)

The Smyth Research Realiser A16 recreates, in headphones, the complete experience of listening to any real loudspeaker system in a real studio (or any other room) - in up to sixteen channel surround sound.

The emulation includes the precise localization of all the speakers in the studio, the room acoustics, and the response of the speakers and electronics of the emulated system.

In immediate A/B comparison between the actual studio/speakers and the Realiser/headphones, listeners say the two are indistinguishable. Head tracking keeps the sound field stationary as the listener's head turns.

With its precise emulation of studio's, auditoriums, dubbing stages or any other room, the Realiser A16 is an ideal monitoring tool when creating new immersive audio sound tracks for movies, music or games.

- The Worlds Most Advanced 3d Audio Processor
- Renders up to 16 virtual loudspeakers in any position in headphones
- Internally decodes Dolby Atmos, DTS:X and Auro 3D*
- Dual-headphone outputs with independent SVS head-tracking
- Personalised room impulse response (PRIR) measurement routines
- Personalisation results in precise replication of dubbing stages and control rooms
- Accurately re-create any speaker format (max 16 speakers) in any listening room
- Online Exchange website for PRIR measurements
- Any speaker format, e.g. Dolby Atmos, DTS:X, Auro-3D, Ambisonics and legacy
- 16 single-ended analog audio inputs
- 16 digital PCM audio inputs (24-bit 96kHz) via USB
- 8 digital PCM audio inputs (24-bit 192kHz) via HDMI
- ASIO drivers for OSX and Windows
- Available in desktop and 2U rack-mountable format
